

UNIVERSITY OF KENTUCKY

Revised CIP Codes from AY 2019-2020

Background: The Classification of Instructional Programs (CIP) codes are a standard statistical coding tool that are intended to be generic categories into which program completions data can be placed. They are not exact duplicates of a specific major or field of study and are not a prescriptive list of officially recognized or permitted programs. The CIP code is the accepted federal government statistical standard on instructional program classification and is used by the National Center for Education Statistics in the Integrated Postsecondary Education Data System (IPEDS), other Department of Education offices, states agencies, national associations, and employment counseling services for collecting, reporting, and analyzing instructional program data.

Below are CIP code changes that have occurred during the 2019-2020 academic year at the University of Kentucky. All changes were processed by the Office of Strategic Planning & Institutional Effectiveness and have been submitted and approved by the Council for Postsecondary Education (CPE).
