

CHANGE UNDERGRADUATE DEGREE PROGRAM

PLEASE NOTE: To ensure that a series of changes to an existing degree program does not essentially create a new program, the Southern Association for the Accreditation of Colleges and Schools (SACS) requires submission of its Substantive Change Checklist for every program change. Prior to college-level review, you must fill out and submit the [SACS Substantive Change Checklist](#) to the Office of Institutional Effectiveness. Contact Institutional Effectiveness (institutionaleffectiveness@uky.edu) for assistance.

Once approved at the college level, your college will send the proposal to the appropriate Senate academic council (HCCC and/or UC) for review and approval. Once approved at the academic council level, the academic council will send your proposal to the Senate Council office for additional review and then a 10-day posting online, during which senators review on their own and have an option to register an objection if they so desire. If no objection is raised to the Senate Council Office within ten days of the posting the proposal, then the program change is approved. The Senate Council Office will report approvals to the Provost, Registrar and other appropriate entities, including the contact person.

For every proposed change, you MUST also include the existing requirement.

1f	Will there be any changes regarding a track(s) for the program?			Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
1g	Accrediting agency, if applicable:			
1h	Date of most recent periodic program review for this degree:		2015	
1i	Requested effective date:	<input checked="" type="checkbox"/> Fall semester following approval.	OR	<input type="checkbox"/> Specific Date ⁴ : <i>Fall 20</i>

¹ Prior to college-level review, you must fill out and submit the SACS Substantive Change Checklist to the Office of Institutional Effectiveness. You can reach Institutional Effectiveness by phone or email (257-2873 or institutionaleffectiveness@uky.edu).

² It is not possible to change the home academic unit of a degree program via this form. To change the home unit, visit <http://www.uky.edu/faculty/senate> and search for forms related to academic organizational structure.

³ The CIP code is provided by Institutional Effectiveness. If a different CIP code is necessary, the program may undergo a review similar to the new program approval process.

⁴ No program change(s) will be effective until all approvals are received.

CHANGE UNDERGRADUATE DEGREE PROGRAM

1j	Contact person name:	Jennifer Osterhage	Phone / Email:	257-9322 / jennifer.osterhage@uky.edu
----	----------------------	--------------------	----------------	---------------------------------------

2. Overview of Changes

2a	Describe the rationale for the changes, including results from the most recent program review if applicable. (450 word limit)
	<p>We propose to establish seven tracks within the Biology B.S. degree. To complete a track, 12 upper-level Biology elective hours out of 15 required must be completed from the courses listed for each track. The other three credit hours can be fulfilled with any course from the General Biology electives list. This change does not affect the total number of hours required for the Biology B.S. degree, nor does it change any Biology core requirement. If students do not declare an alternative track, the default track will be General Biology. The establishment of tracks within the Biology major offers many advantages for both students and faculty. Students will gain:</p> <ol style="list-style-type: none"> 1. A commitment to a topic of study within the Biology major 2. Structure to / knowledge of upper level electives to develop their field of interest 3. Documented expertise in an area for those seeking admission to graduate school, professional school or specialized careers 4. Connection to research mentor <p>Rationale: By providing students a list of courses within a specific discipline in biology, we can help ensure that they are gaining competency and a thorough understanding of that subfield in biology. Each course given in the individual tracks provides valuable information and insight into the principles and practices of each subfield. There is sufficient variety in each track's courses that the student can choose a path that best matches their interests or future career goals while still gaining an understanding of the overarching concepts in that field. With the tracks, we hope to make the students' scheduling choices easier, while also providing them a more comprehensive study of their chosen subfield within biology.</p>

2b	Use the fields below, as applicable, to identify the areas in which changes will be made.		
		Current	<i>Proposed</i>
i.	Credit Hours of Premajor Courses:	25	25
ii.	Credit Hours of Preprofessional Courses:		
iii.	Credit Hours of Major Core Course Requirements	24	24
iv.	Minimum Credit Hours of Guided Electives:	32	32
v.	Minimum Credit Hours of Free Electives:	6	6
vi.	Credit Hours for Track 1 (name): 7 total tracks, see 5j and additional tracks documents		120

CHANGE UNDERGRADUATE DEGREE PROGRAM

	TOTAL CREDIT HOURS REQUIRED FOR GRADUATION:	<u>120</u>	<u>120</u>
xv.	If the total hours required for graduation have changed, explain below. (150 word limit)		
	This proposal does not change any requirement for the major or the total credit hours required for graduation.		
2c	Will the requested change(s) result in the use of courses from another educational unit?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
	If "Yes," describe generally the courses and how they will used.		
	There are courses from outside our department that are listed as possible electives in each track. The majority of these courses have been on our "accepted electives" list for many years. We have added some new courses when relevant and appropriate. The syllabi for each of these newly added courses were vetted by the Biology Undergraduate Affairs Committee. We have communicated with each of the affected departments and have attached evidence of support.		
	If "Yes," two pieces of supporting documentation are required.		
	<input checked="" type="checkbox"/> Check to confirm that appended to the end of this form is a letter of support from the appropriate chair/director ⁵ of each unit from which individual courses will be used.		
	<input checked="" type="checkbox"/> Check to confirm that appended to the end of this form is verification that the chair/director of each affected unit has consent from the faculty members of the unit. This typically takes the form of meeting minutes.		
2d	Will the proposed change(s) affect an associated minor?	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
	If "Yes," the department must also submit a change form to change the minor.		
3. Course Sharing			
3a.	Will the requested changes result in the use of courses from another unit?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
	If "Yes," describe generally the courses and how they will used.		
	There are courses from outside our department that are listed as possible electives in each track. The majority of these courses have been on our "accepted electives" list for many years. We have added some new courses when relevant and appropriate. The syllabi for each of these newly added courses were vetted by the Biology Undergraduate Affairs Committee. 5k	<p>Provide the Bulletin language for the track.</p> <p>The Cellular, Molecular, and Developmental Track provides a broad background in biology, with a focus on the molecular, cellular, and integrative mechanisms by which organisms regulate life processes. Students will learn about the molecular and cellular mechanisms that provide the basis for biological structure, growth, evolution, embryonic development, and genetic inheritance. Students will understand how eukaryotic cells process information from their environment and initiate programs of gene expression leading to growth, development, and functional specification.</p> <p>A degree in biology with an emphasis in Cellular, Molecular, and Development will prepare students for a career in the life sciences, whether they are interested in understanding the molecular mechanisms underlying cell growth, or the complex patterns of organismal development. This can help prepare students for a career in academic or industrial research, biotechnology, genetic engineering or any of the health professions.</p> <p>12 upper-level guided elective hours out of the required 15 hours of guided electives must be completed from the courses listed below. Of those 12 hours, a maximum of 3 hours can be independent research (BIO 394/395/397). The remaining 3 credit hours may come from the list of approved electives for the general biology track, which may include an additional three hours of independent research (BIO 394/395/397). A maximum of 6 credit hours of independent research can be counted toward the Biology degree. Of the 15 hours of total upper-level electives required, 9 credit hours must have a BIO prefix.</p> <p>BIO 308: General Microbiology (3) BIO 309: Microbiology Lab (2) BIO 429: Developmental Biology (3) BIO 494G: Immunobiology (3) BIO 394/395/397: Research in Neuroscience/Biology/Microbiology (maximum 3 credit hours toward track) (1-3) BIO 495G: Bacterial Pathogenesis (3) BIO 502: Principles of Systems, Cellular and Molecular Physiology (5) BIO 510: Recombinant DNA Techniques Laboratory (4) BIO 520: Bioinformatics (3) BIO 527: Stem Cells, Tissue Engineering, and Regenerative Medicine (3) BIO 582: Virology (3) BIO 542: Histology (5) BIO 410: Vertebrate Endocrinology (3) BIO 380: Special Topics in Biology (Intermediate Level)(Subtitle required). 5k		Provide the Bulletin language for the track.				
<p>The Ecology and Evolutionary Biology Track focuses on the diversity of life on Earth, including diversity in genes, physiology, and behaviors. Students will learn about how this diversity emerged, as plants, animals, and microbes became adapted to the environment and to each other. A wide variety of scientific disciplines are integrated within the track, including ecology, organismal biology, physiology, genetics, evolution, conservation biology, and behavior. A degree in biology with an emphasis in Ecology and Evolution will prepare students for a career in the life sciences, whether they are interested in having a deep understanding of evolutionary process, or are interested in the interactions between organisms and their environment. This can help prepare students for careers in areas such as: 1. conservation and restoration biology—addressing the impacts of climate change, developing plans for habitat conservation and wildlife protection, or other issues critical to maintaining a healthy planet; 2. working as a doctor or veterinarian; 3. science education—educating students and the public on the history and diversity of life on earth and the need to conserve it; 4. basic research in biology—helping to expand the frontiers of knowledge by studying the evolution of organisms and their ecosystems.</p> <p>12 upper-level guided elective hours out of the required 15 hours of guided electives must be completed from the courses listed below. Of those 12 hours, a maximum of 3 hours can be independent research (BIO 394/395/397). 5k		Provide the Bulletin language for the track.					
<p>The Genetics, Genomics, and Bioinformatics track will provide guidance and structure to students with a desire to specialize in the study of inheritance and will formally recognize their chosen area of specialization in the description of their degree. The selected course offerings span the spectrum of studies within the area of inheritance, allowing students to select broadly from courses that provide sophisticated insight into genetic information and genetic analysis. The selected courses also allow students to dive deeply into different realms of genetics, including: emphasis on microbes (BIO 308, 309 and 510); emphasis on animals (BIO 404, 405, 429, 527); emphasis on analytical technology (BIO 337, 404, 461, 510, 520, STA 579, STA 580, ABT 460); emphasis on development (BIO 404, 405, 429, 445, 527, PGY 417); and emphasis on evolution (BIO 461, 508, 518).</p> <p>Students selecting this track will be able to demonstrate a clear understanding of the most important and fundamental theories and ideas in contemporary biology from a perspective that emphasizes inheritance, organization, and analysis of genetic information.</p> <p>12 upper-level guided elective hours out of the required 15 hours of guided electives must be completed from the courses listed below. Of those 12 hours, a maximum of 3 hours can be independent research (BIO 394/395/397). The remaining 3 credit hours may come from the list of approved electives for the general biology track, which may include an additional three hours of independent research (BIO 394/395/397). A maximum of 6 credit hours of independent research can be counted toward the Biology degree. Of the 15 hours of total upper-level electives required, 9 credit hours must have a BIO prefix.</p> <p>BIO 308: General Microbiology (3) BIO 309: Microbiology Laboratory (2) BIO 337: Mathematical Modeling in the Life Sciences (3) BIO 394/395/397: Research in Neuroscience/Biology/Microbiology (max 3 credit hours toward track) (1-3) BIO 404: Advanced Genetics (3) BIO 405: Human Genetics (3) BIO 429: Developmental Biology BIO 445: Biology of Sex (3) BIO 461: Introduction to Population Genetics (3)</p>

	<p>Physiology is the study of function of living organisms, primarily plants and animals. The field studies cells, tissues, organs, and the whole organism. To understand function, a mechanistic approach is used to integrate the cell level to the whole organism. The study of animal behavior and physiology go hand and hand in addressing the functional mechanisms which regulate behavior. This track will prepare pre-professionals in health science areas (MD, DO, DDS, and PT), researchers in the function of animals and plants (MS /PhD), and ecologists.</p> <p>12 upper-level guided elective hours out of the required 15 hours of guided electives must be completed from the courses listed below. Provide the Bulletin language for the track.						
<p>The Pre-Professional Track in the biology major broadly explores organismal structure and function in the context of preparing students for health-related professional programs. The courses in this track give the students a broad view of both normal and abnormal organismal function, with courses specializing in neuroscience, physiology, microbiology, and molecular biology. Independent research in this track will be an opportunity for students to work with science professionals within their desired field. Through completion of this track, students can fulfill pre-requisite and recommended courses for most pre-professional health programs. Students who excel in this track can go on to enroll in a variety of professional programs, including medical, dental, optometry, veterinary, and physician’s assistant programs. A biology degree with a pre-professional health emphasis also prepares students for careers as research scientists, research lab technicians, microbiologists, genetic counselors, biology teachers, and many other general biology careers.</p> <p>12 upper-level guided elective hours out of the required 15 hours of guided electives must be completed from the courses listed below. Of those 12 hours, a maximum of 3 hours can be independent research (BIO 394/395/397). Proposal: Establish tracks within the Biology B.S. Degree and B.A. with Topical Focus Option Degrees

Background: We currently offer both B.S. and B.A. degrees in Biology. The Biology B.S. degree requires 15 hours of guided upper-level electives, which students can choose from a long list of approved electives.

The B.A. degree has two “Options”. Option A requires the completion of a minor. The Option A B.A. degree requires 4-9 credit hours of guided upper level electives, which varies depending on the minor chosen. Option B requires the completion of a Topical Focus, in which students design their own 12 credit hour “minor” based on their interests. The Option B B.A. degree (Topical Focus) requires 13-15 credit hours of guided upper-level electives.

Proposal: We propose to add seven “tracks,” or specialties within the B.S. and B.A. Option B (Topical Focus degrees). The tracks will not be an option for students pursuing the B.A. with minor option since this option requires less than 12 credit hours of upper-level electives. This change **does not** change the total number of hours required for the Biology B.S. or B.A. Option B degrees, nor does it change any Biology core requirement.

To complete a track, 12 upper-level guided elective hours out of the required 13-15 hours of guided electives must be completed from the courses listed for each track. Of those 12 hours, a maximum of 3 hours can be independent research (BIO 394/395/397). The remaining 3 credit hours may come from the list of approved electives for the general biology track, which may include an additional three hours of independent research (BIO 394/395/397).

As with our current degree, a maximum of 6 credit hours of independent research can be counted toward the Biology degree. Of the 15 hours of total upper-level electives required, 9 hours must have a BIO prefix.

Any student with less than 45 credit hours will be enrolled in the General Biology Track by default. *Alternate tracks can be declared when students have earned at least 45 credit hours.* If students do not declare another track, they will earn the General Biology Track.

Students can receive formal recognition for the completion of one track only.

Rationale:

By providing students a list of courses within a specific discipline in biology, we can help ensure that they are gaining competency and a thorough understanding of that subfield in biology. Each course given in the individual tracks provides valuable information and insight into the principles and practices of each subfield. There is sufficient variety in each track’s courses that the student can choose a path that best matches their interests or future career goals while still gaining an understanding of the overarching concepts in that field. With the tracks, we hope to make the students’ scheduling choices easier, while also providing them a more comprehensive study of their chosen subfield within biology.

The establishment of tracks within the Biology major offers many advantages for both students and faculty. Students will gain:

1. A commitment to a topic of study within the Biology major
2. Structure to / knowledge of upper level electives to develop their field of interest
3. Documented expertise in an area for those seeking admission to graduate school, professional school, or specialized careers
4. Connection to research mentor

Faculty will:

1. Connect with BIO 395 students with specific interests in their field
2. Teach upper-level courses that fit their interests
3. Teach students seeking expertise in their field

Osterhage, Jennifer

From: Mathews, Alice
Sent: Monday, December 04, 2017 11:15 AM
To: Osterhage, Jennifer
Subject: RE: Update on Substantive Change

Jennifer,

Thank you for your emails regarding the proposed program change(s) to the **Bachelor of Arts/Science in Biology (26.0101)**.

My email will serve 2 purposes: 1.) Next steps for SACSCOC, and 2.) Verification and notification that you have contacted the Office of Strategic Planning and Institutional Effectiveness (OSPIE)—a Senate requirement for proposal approval.

1. **Next steps for SACSCOC:** None required
2. **Verification that OSPIE has reviewed the proposal:** Based on the proposal documentation presented and Substantive Change Checklist, the proposed program changes (refer to list below) are not substantive changes as defined by University or SACSCOC, the university's regional accreditor. Therefore, no additional information is required by the Office of Strategic Planning & Institutional Effectiveness at this time. The proposed program change(s) may move forward in accordance with college and university-level approval processes.

List of Proposed Change(s):

- Establish the following tracks
 - Pre-Professional Health Track
 - Cellular, Molecular & Development Biology Track
 - Ecology and Evolutionary Biology Track
 - Genetics, Genomics & Bioinformatics Track
 - Physiology and Behavior Track
 - Plant Biology Track
- To complete a track, 12 upper-level Biology elective hours out of 15 must be completed from the courses listed for each track. This change does not affect the total number of hours required for the Biology B.S. degree, nor does it change any Biology core requirement. The establishment of tracks within the Biology major offers many advantages for both students and faculty.

Should you have questions or concerns about UK's substantive change policy and its procedures, please do not hesitate contacting me.

Alice Mathews

Subject: RE: Update on Substantive Change

Hi Alice,

I have attached the Senate Undergraduate Change form (and additional pdfs for our tracks). The change proposed for the B.A. is exactly the same. Do you need a separate senate form for the B.A change?
Please let me know if you need anything else! I hope you have a great weekend.
Best,
Jennifer

Subject: Update on Substantive Change

Hello Jennifer,

I was looking through our records today and saw that we are waiting on the Senate's Undergraduate Change form. We need this form before we can make a determination on whether or not your proposed change is considered to be substantive. Please let us know if we can provide any assistance!

Thanks!

Alice Mathews

University of Kentucky Substantive Change Checklist¹

Substantive change, according to the Commission on Colleges of the Southern Association of Colleges and Schools (SACSCOC or SACS), is “a significant modification or expansion of the nature and scope of an accredited institution.”² Substantive change is a federal concept, based in the regulations of the U.S. Department of Education,³ which regional accreditors are required to enforce.

The University is required to submit any substantive change to SACS for review, and in some cases approval, prior to implementation of such substantive change. As noted by SACS:

“if an institution fails to follow the substantive change policy and procedures of the Commission on Colleges, it may lose its Title IV funding or be required by the U.S. Department of Education to reimburse it for money received by the institution for programs related to the unreported substantive change. In addition, the institution’s case may be referred to the Commission for the imposition of a sanction or for removal from membership.”⁴

Checklist Instructions: To ensure substantive change compliance, individuals should complete the checklist on the following pages in the early stages of any proposal (e.g. new degree program, new certificate program, etc.) or curricular revision. **Upon completion, the form must be submitted to the assistant provost for Strategic Planning and Institutional Effectiveness or designee by e-mail to OSPIE@uky.edu. A determination as to whether the proposed program or changes to the existing program constitutes a substantive change will be made within seven (7) business days of receipt and next steps will be communicated accordingly.**

Questions concerning substantive change should be sent to OSPIE@uky.edu.

¹ Adapted, with appreciation, from University of Virginia’s “Substantive Change Checklist.”

² See [Substantive Change for Accredited Institutions of the Commission on Colleges: Policy Statement](#), p. 1.

³ See [34 C.F.R. § 602.22](#).

⁴ See [Substantive Change for Accredited Institutions of the Commission on Colleges: Policy Statement](#), p. 9.

University of Kentucky

Substantive Change Checklist

Instructions: Email completed form to OSPIE@uky.edu, Subject line: UK Sub Change. Questions concerning substantive change should be sent to OSPIE@uky.edu.

Please note: there is a 200 character limit for each text box.

- ‡ Incoming Students are Strongly Encouraged to take WRD 112 to fulfill the CC1 and CC2 requirements if they have any of the following: an ACT English score of 32 or Higher, an SAT Verbal score of 720 or Higher, or an AP English Composition score of 4 or 5. If the Student has been accepted into the University Honors Program, the Student is required to take WRD 112, instead of CC1 and CC2.
- * To be discussed with your academic advisor. Consider pursuing a 2nd major or minor.
- ‡ Students who have taken at least 2 years of a language in high school can complete the A&S Foreign Language Requirement with 3 college semesters of a different language. Students choosing this option should replace the 4th semester of language with electives. Also note that if you take a foreign language placement exam, you may be exempt from 1 or more of the beginning semesters of that language. In this case, replace the by-passed language courses with electives. Any language sequence may be used to satisfy the foreign language requirements - French, German, Greek, or Latin is recommended.
- ◇ 6 hours of 'free' electives - that do not count toward any other requirement - must be taken. Additional electives may be required to reach the required minimum of 120 hours. Consider pursuing a 2nd major or minor.
