PROFESSIONAL SUPPORT

In addition to the major requirements, each student in consultation with his or her academic advisor will select a minimum of 18-21 credits in coursework in a university-recognized minor. At least 12 of these hours must be at the 300 level or above. A minor is a structured group of courses that leads to considerable knowledge and understanding of a subject. Suggested minors include Psychology, Sociology, Women's Studies, Anthropology, Economics, Political Science, Appalachian Studies, Business, Communication, Health Promotion, Human Nutrition, Community and Leadership Development, etc.

Students must contact the department responsible for the minor program for guidance and advising.

ELECTIVES: Electives at the 300 level or above to reach 120 credits including sufficient credits to reach 45 hours at the 300 level or above. Here work with an advisor to select additional FAM classes if available.

TOTAL HOURS: 120

7. Rationale for Change(s): (If rationale involves accreditation requirements, please include specific references to those requirements.) The new program is in response to recent changes which eliminated a cumbersome two options model with Family and Consumer Sciences and Family and Consumer Sciences Education. That uncoupling made it possible to streamline the existing Family and Consumer Sciences option and focus on the specific knowledge and skills needed by our graduates. Streamlining the undergraduate program will free up resources to address ongoing growth in the Department's graduate programs and its research mission. This revised program meets guidelines established by the National Council on Family Relations Family Life Educator Certification.

Hi Professor Smith,

By now, I have received all the Curriculum Committee members' responses. They think that your proposal can be workable with us, assuming that (1) PSY 223 is not going to be cross-listed with FAM 255, (2) our department is not expected to save a certain # of openings in PSY 233 for your majors, and (3) our department is not expected to equate a transferred child development course to PSY 223.

Please let me know whether I can further assist you with the proposal.

Best regards,

Sung Hee

Thanks so much. Fam 255 has 60 students in it this semester and we are planning 2 sections of it for Falleach with 60-70 students.

Hope this helps.

Professor Smith,
I forwarded your e-mail to our Curriculum Committee, Chair and Associate Chair for their thought on your proposal. As soon as I hear from all members, I'll let you know.

Best,
Sung Hee
P.S. A couple of questions on FAM 255. What is the class size? Do you plan to offer it every semester?

Dear Dr. Kim,

We are presently revising our Undergraduate major in Family Studies. In our current major we require Fam 254/Psy 223 which are no longer cross-listed. The psyche department has graciously allowed our students to continue taking 223.

In the revised program we would like to require our students to take wither Fam 255-Child Development or Psy 223 Developmental Psychology. Would this be ok with your department. We are talking about maybe 30 students per semester.

Thanks for getting back to me as soon as possiblewe'd like to get these program changes out of our college in the next few weeks.

Thanks so much for your time. I look forward to hearing from you.

Re: Revision of the Undergraduate Program in Family and Consumer Sciences
(non-teaching option)

Attached you will find the paperwork for a request for change in the **Bachelor of Science in Family and Consumer Sciences** (non-teaching option) in the Department of Family Studies including all the corrections and suggestions from our Fall 2006 meeting. The new program is in response to recent changes which eliminates a two-option model with Family and Consumer Sciences and Family and Consumer Sciences Education. That uncoupling made it possible to streamline the existing Family and Consumer Sciences option and focus on the specific knowledge and skills needed by our graduates. Streamlining the undergraduate program will free up resources to address ongoing growth in the Department's graduate programs and its research mission. This revised program meets guidelines established by the National Council on Family Relations Family Life Educator Certification.

We are proposing the following changes –

1. Elimination of the two-option model with Family and Consumer Sciences Education necessitates changing the name of the Family and Consumer Sciences (non-teaching option) to Family Science. The proposed Family Science title would eliminate the ongoing confusion between whether students are majoring in FCS education or FCS (non-teaching option). The proposed title reflects the home department's name (Family Studies), the faculty expertise, and the research and teaching mission of the department.
2. Re-alignment of course requirements in light of changes in the University Studies program
3. We are now requiring NFS 101 as part of the **College Depth and Breadth of Study Requirement**.
4. Under the **pre-major requirements COM 252** is now required.
5. We have reduced the **major requirements from 54 hrs. to 27 hrs.** (According to College of Agriculture guidelines for curriculum development, students must have a defined major of at least 24 hours, including a 3-hr 400-level capstone course which is **FAM 499**).
6. A revised course description for FAM 499 to better reflect the emphasis on a Cooperative Extension and/or Research Internship.

7. Under the category of **Professional Support** each student in consultation with their advisor will select a minimum of **18-21 credits** in coursework in a university-recognized minor. At least 12 of these hours must be at the 300 level or above (suggested minors are included in the proposal).
8. This program includes **17-20 hrs.** of electives to reach **120 credits** including sufficient credits to reach 45 hours at the 300 level or above.
9. The net result of these changes will show a reduction in required credit hours **from 128 to 120**. This should help students move through the program more efficiently.
