Subject: Final Exam Request

Dear Sheila,

I am course coordinator for MA 202, and two of the sections are being taught by a TA, Clinton Hines. He would like to combine the final exams for his two sections so that the exam is administered only once (and also that there would not be the need to create separate exams). The final for one section (401) is already scheduled for Tuesday of exam week at 6 pm, and he would like to move the final exam for the other section (005) to that date as well, assuming that this can be approved, and that a suitable room can be found. All of the students in Section 005 have agreed to this change if it can be made. I was told that I should convey this request to you.

Thank you!

Carl
