UNIVERSITY OF KENTUCKY

*Dream • Challenge • Succeed*

**MEMORANDUM**

**Date:** March 28, 2008

**To:** Jane Kirschling, Dean

**From:** Phil Kraemer, Associate Provost for Undergraduate Education 

**Re:** USP Natural Science Requirement

You provide a compelling rationale to allow Nursing majors to satisfy the 6-hour natural science component of the University Studies Program (USP) through combinations of courses in anatomy, physiology, microbiology, and the new Chemistry for Health Sciences (CHE 103) once it is approved by the University Senate. Given the expectations that USP will soon be revised, it is reasonable for my office to approve your request rather than ask the USP Committee to evaluate it. Accordingly, I approve the above change effective fall 2008.
