RE: Revision to PharmD Dual Degree Program Course Requirements

The College of Pharmacy offers several dual degree programs in conjunction with the Doctor of Pharmacy (PharmD) degree. An element of these programs is the ability for courses that are required in the PharmD degree to satisfy curricular components (e.g., electives, prerequisites, required courses) of the corresponding masters degree program. The PharmD program is in the midst of implementing a new curriculum, and thus the coursework that the dual degree partners consider suitable to meet the masters program requirements has changed. Thus, we seek approval for minor revisions to the course requirements for the following programs:

Masters Program Requirement	PharmD Curricular Component	Credit Hours
<i>PharmD / MBA</i>		
DIS 612 Supply Chain Operations	PHR 951 Scholarship 1	3
MGT 612 Negotiations and Conflict Resolutions	PHR 964 Pharmacy Operations and Financial Management	3
<i>PharmD / MPA</i>		
Area of concentration coursework	PHR 951 Scholarship 1	3
Area of concentration coursework	PHR 964 Pharmacy Operations & Financial Management	3
<i>PharmD / MPH</i>		
Elective coursework	PHR 933 Policy, Outcomes, and Public Health	3
<i>PharmD / MSPS</i>		
PHS 951 Cardiopulmonary / Renal Therapeutics (previous course)	PHR 951 Scholarship 1	3
PPS 966 Pharmacotherapy 3 (previous course)	PHR 961 Scholarship 2	3

Of note:

- This request applies to students who matriculated in the PharmD program in Fall 2016 or thereafter, to coincide with the date effective for the PharmD program curricular change.
- The PharmD/MSPAS program is not a component of this request. That program does not currently have any enrollees and is not admitting students, pending a program re-evaluation in light of external accreditation requirements.

Please advise if you need further information for this request.

The College of Pharmacy and the Gatton College of Business and Economics offer a PharmD/MBA dual degree. A structural component of that dual degree is the allocation of specific pharmacy courses to satisfy curricular requirements of the masters program. The PharmD curriculum has changed, and the allocation of those courses is now being revised to reflect those changes.

The following MBA courses are satisfied by the PharmD curriculum:

MBA Curriculum	Credit Hours	PharmD Curriculum	Credit Hours
DIS 612	Supply Chain Operations	PHR 951 Scholarship 1	3
MGT 612	Negotiations & Conflict Resolutions	PHR 964 Pharmacy Operations & Financial Management	3

These changes apply to students who matriculated in the PharmD program in Fall 2016 or thereafter, to coincide with the date effective for the curricular change.

If there are any questions please let me know. Thank you.

MEMORANDUM

To: Dr. Brian Jackson, Dean of the Graduate School

From: David J. Feola, Pharm.D., Ph.D., Director of Graduate Studies, Pharmaceutical Sciences

Date: April 11, 2017

RE: Pharm.D./Masters in Pharmaceutical Sciences Dual Degree Program

The College of Pharmacy offers a dual degree option for a portion of the students in the Doctor of Pharmacy Program to, in addition, earn a Masters of Science Degree in Pharmaceutical Sciences. A component of this program has been to allocate specific courses from the Pharm.D. professional program to also satisfy the curricular requirements of the Masters Program. Because the College of Pharmacy has instituted a new curriculum, we are in need of revising the selection of courses that will now be used for dual credit.

The following courses have been approved by the Graduate Faculty of the College of Pharmacy as serving the dual degree:

Former Masters Requirement	New PharmD Curricular Component	Credit Hours
PHS 951 Cardiopulmonary/Renal Therapeutics	PHR 951 Scholarship I	3
PPS 966 Pharmacotherapy 3	PHR 961 Scholarship II	3

These changes would apply to students who have entered the Pharm.D. program in 2016 or thereafter to coincide with the date in which the curriculum changed.

Please let me know if there are any questions that can be addressed concerning these changes.

Thanks!

Martin School of Public Policy and Administration

MEMORANDUM

To: Dr. Brian Jackson, Dean of the Graduate School
From: Eugenia F. Toma, DGS, MPA/MPP *est*
Date: April 11, 2017
Re: PharmD/MPA Dual Program

The College of Pharmacy and the Martin School of Public Policy and Administration offer a PharmD/MPA dual degree. The Martin School has used two pharmacy courses to satisfy the elective requirements for the PharmD/MPA program.

Our faculty voted to accept the two new pharmacy courses, PHR 951 Scholarship 1 and PHR 964 Pharmacy Operations & Financial Management, as courses that our PharmD/MPA students may use for the 'area of concentration' courses that are satisfied by the MPA curriculum.

These changes apply to students who are admitted in the PharmD program in Fall 2016 or thereafter, to correspond to the date effective for the curricular change.

Should you have any questions or comments, please let me know. Thank you.

Frank Romanelli, PharmD, MPH
Professor & Associate Dean
College of Pharmacy
University of Kentucky

Dear Dr. Romanelli:

This letter confirms that the College of Public Health has reviewed the changes to the dual degree program (PharmD/MPH) that are being implemented as part of changes to the College of Pharmacy curriculum. A structural component of that dual degree is the allocation of specific pharmacy courses to satisfy curricular requirements of the MPH degree. The PharmD curriculum has changed, and the allocation of those courses is now being revised to reflect those changes. Per our discussions, under the dual degree program, 3 credit hours of the MPH program's required elective coursework will be satisfied by the College of Pharmacy course, PHR 933 Policy, Outcomes, and Public Health. The required public health practicum hours will continue to be satisfied by successfully completing the one of the Pharmacy practice experience courses; however, students will register for CPH609 (3 credit hours) to ensure completion of the required public health practicum paperwork and to be assigned a letter grade, per Graduate School rules. Dual degree students will complete an additional 36 credit hours of MPH coursework, per the degree requirements for their specific concentration. These changes apply to students who matriculated in the PharmD program in Fall 2016 or thereafter, to coincide with the date effective for the curricular change.

Sincerely,

A handwritten signature in black ink that reads "Corrine Williams".
