Proposed Significant Change to MS Nursing

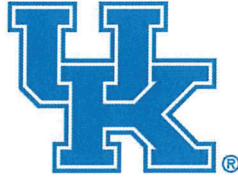

This is a recommendation that the University Senate approve the significant change to the MS: Nursing, in the College of Nursing.

Rationale:

The significant change is to reopen admission to the MS Nursing program, which was previously suspended in 2012. Only the option Healthcare Systems Leadership (a revision of the previous Nursing Management option) is being reopened. The program previously had seven specialty tracks and multiple specialties in some tracks. The college originally suspended admission to move the preparation of advanced practice nurses to the Doctor of Nursing Practice program as recommended by the American Association of Colleges of Nursing. Since that move, the college has received multiple requests to resume admission of students to the program. Survey data strongly indicates the demand among Kentucky nurses for this program.

Carl Mattacola, PhD, ATC, FNATA
Chair, Health Care Colleges Council
Room 123F Wethington Bldg.
CAMPUS 0200

Dear Carl:

Attached is a request to revise the Master of Science in Nursing degree program. The College of Nursing faculty approved a proposal to reopen admission, Fall 2019 to the Master of Science in Nursing program to accommodate a need for BSN prepared nurse managers or nurses in other leadership related roles to earn a higher degree.

With the creation of the MSN in Healthcare Systems Leadership, core and specialty courses in the BSN to DNP program were divided between the MSN level and the MSN to DNP level, based on what courses are traditionally offered at either a Master's level or an MSN to DNP level. This resulted in changes needing to be made in the BSN to DNP and MSN to DNP Leadership curriculum and the overall required credit hours. You will receive a separate request for a DNP Program change to address these changes.

Related new courses and course changes have been submitted via Curriculog.

New courses:

NUR 660	MSN Capstone Practicum
NUR 730	Leading Change: Seminar
NUR 731	Leading Change: Practicum
	Relationship-Based Leadership in Healthy Working
NUR 737/973	Environments: Practicum

New MSN course cross listing with existing DNP course:

NUR 610/902	Nursing Leadership in Health Care
NUR 614/914	Economic and Financial Aspects of Clinical and Population-Based Health Care Delivery Systems
NUR 617/917	Technology for Transforming Nursing and Health Care
NUR 615/915	Evaluating Evidence for Research and Evidence-Based Practice
NUR 619/919	Quality and Safety in Nursing and Healthcare
NUR 624/924	Concepts, Theories, and Models for Advanced Practice Nursing
NUR 736/972	Relationship-Based Leadership in Healthy Working Environments: Seminar

Other course mentioned in proposal:

NUR 602/925 Research Methods in Advance Practice Nursing. This course is already approved. No change needed.

Sincerely,

Carol Thompson PhD, DNP, ACNP-BC, FNP-BC, FCCM, FAANP, FAAN
Professor and Assistant Dean of MSN & DNP Program Studies

seeblue.

An Equal Opportunity University

psychological, social, economic, cultural, political, ethical, legal, and geographic factors)

- Evaluate the outcomes of advanced practice nursing and health care using appropriate research methods
- Use theory in the management of health care resources to deliver effective and efficient clinical services and programs
- Collaborate with others to meet the health needs of populations
- Contribute to the advancement of health and health care through leadership in practice and the profession
- Collaborate with others to identify and resolve ethical issues in health care practices, research, and policies

PROPOSED

Admission Requirements -

The Master of Science in Nursing in Healthcare Systems Leadership program builds on a student's undergraduate degree, and prepares the individual for advanced practice nursing in a chosen specialty. Research utilization, evidence-based practice, and leadership are emphasized throughout the program. Applicants to the master's degree program must meet the minimum requirements of the Graduate School, as well as the following requirements of the nursing program: Minimum undergraduate grade point average of 3.0 on a 4.0 grading scale; Baccalaureate degree in nursing from a school accredited by a nationally recognized organization and goal statement, three references, and interview. Unencumbered RN licensure required in/for the state where clinicals take place. Final admission recommendations are made on a competitive basis.

CURRENT

Admission requirements -

Applicants to the master's degree program must meet the minimum requirements of the Graduate School, as well as the following requirements of the nursing program: satisfactory scores on the Graduate Record Examination (GRE), a minimum undergraduate grade point average of 2.75 on a 4.0 grading scale, a baccalaureate degree in nursing from a school accredited by a nationally recognized organization, a goal statement, three references, an interview, and a graduate-level statistics course (completed prior to admission). Nurse licensure in the state where clinicals take place, and clinical experience prior to the first clinical course, are also required. Final admission recommendations are made on a competitive basis.

13. Please explain the rationale for changes. If the rationale involves accreditation requirements, please include specific references to those requirements.

The UK CON suspended admission of students to the Master of Science in Nursing program in 2012 in order to move the preparation of advanced practice nurses to the Doctor of Nursing Practice (professional clinical doctorate) program as recommended by the American Association of Colleges of Nursing. At that time the MSN program offered seven specialty tracks and multiple specialties in some tracks. This proposal is recommending reinstatement of only the MSN - Nursing Management option with applicable revisions.

The college has received multiple requests from the community to again start admitting students to this program. Ky nursing statistics data from 2013 illustrated that only 18 out of 46 Ky Chief Nursing Officers (CNO) had an MSN or higher degree; and only 20 out of 160 managers had an MSN or higher degree. The UK Blue Ribbon Committee recommendation included a Master's program in nursing. Findings from an April 2016 survey done by the UK CON that was sent to Ky CNO's and other leaders demonstrated a need to implement an MSN in nursing leadership. During a November 2016 day of dialogue meeting with varied academic and practice leaders, the recommendation was made by specific attendees to start a Master's program with an emphasis on administration/executive leadership. In order to respond to this need for Masters level education for Kentucky leaders, the CON has voted to re-instate the Master's program in nursing leadership. The reinstated/new program was renamed and includes a new curriculum and new courses that meet the learning needs of leaders in healthcare today.

Subject: RE: Letter regarding College of Nursing?

Hi Jennifer:

A phone call may be beneficial since I could be missing a key factor here. If we take NUR 610 as an example, Graduate Council's approach was to determine whether the described course meets the standards to be a 600-level course that applies to the resurrected master's program; the conclusion was that yes it does. Since the Graduate School does not oversee the DNP program, we have no role to play in approving this course to also count toward the professional degree. I recognize that true cross-listing typically requires identical syllabi and the same numerical course listings (XXX-610 and YYY-610) but again we did not see this as an issue under our control.

Best,
Brian

Subject: Letter regarding College of Nursing?

Hi Brian,

I think Aaron has already addressed this with you, but the Senate Council pushed back on the College of Nursing reinstatement of the MSN last week. In particular, they asked explicitly for an acknowledgement (email or letter) from you that the 600 level courses identified in the proposal, which are listed as "cross-listed" with 900 level courses (although it doesn't seem like a true cross-listing, since the requirements are different), would be eligible for graduate level credit for the MSN. More specifically, would an MSN student enrolled in a 600 level course, which is co-offered with a 900 level course, get graduate credit that would count towards the MSN? This may be part of a larger conversation we need to have about the "cross-listing" of courses across professional and graduate levels, which I know is something you and I have discussed before. While we try to resolve the larger issue, would you be willing to confirm the particulars of the MSN and its 600-level courses are acceptable? Please let me know if you want to discuss by phone – I'd be happy to explain more, if it's helpful.

Best,
Jennifer

Subject: RE: Checklist for proposed MSN program change

Kathy,

Thank you for your emails regarding the proposed program change(s) to the **Masters of Science in Nursing (51.3801)**.

My email will serve 2 purposes: 1.) Next steps for SACSCOC, and 2.) Verification and notification that you have contacted the Office of Strategic Planning and Institutional Effectiveness (OSPIE)—a Senate requirement for proposal approval.

1. **Next steps for SACSCOC:** None required
2. **Verification that OSPIE has reviewed the proposal:** Based on the proposal documentation presented and Substantive Change Checklist, the proposed program changes (refer to list below) are not substantive changes as defined by University or SACSCOC, the university's regional accreditor. Therefore, no additional information is required by the Office of Strategic Planning & Institutional Effectiveness at this time. The proposed program change(s) may move forward in accordance with college and university-level approval processes.

List of Proposed Change(s):

- Reopen admission for the MSN program
- Introduce the Healthcare Systems Leadership option

Should you have questions or concerns about UK's substantive change policy and its procedures, please do not hesitate contacting me.
