Subject: NEW PhD: Health Services Research

Attachments: Final application 1 20 20.pdf

Proposed New PhD in Health Services Research

This is a recommendation that the University Senate approve, for submission to the Board of Trustees, the establishment of a new PhD degree: Health Services Research, in the Department of Health Management and Policy within the College of Public Health.

Rationale: Health Services Research (HSR) is a multidisciplinary field that studies how social factors, financing systems, organizational structures and processes, health technologies, and personal behaviors affect access to health care and the quality and cost of health care. The proposed Ph.D. in HSR program will provide students with the theoretical and methodological foundations necessary to conduct creative and independent research on these issues with the ultimate goal of identifying evidence-based policy and management pathways to improve health care access, quality, and costs. The curriculum includes coursework in four core areas: theory, concepts, and methods, research methods, a disciplinary specialization (Health Economics or Health Outcomes), and directed research in a substantive area as well as an elective course and a grant writing course. Graduates from the relatively few similar programs are in high demand by academic research centers, federal and state health agencies, nonprofit health and social policy organizations, hospital systems and health insurers, consulting firms, and health care foundations across the country. An initial two students growing to six students is anticipated.

aaron.cramer@uky.edu

Office of Strategic Planning and Institutional Effectiveness (OSPIE). The new program approval process begins when a contact persons submits a "Notification of Intent" (NOI) and substantive change checklist (available HERE) to OSPIE. Units have six months from the point of NOI submission to the time when the completed proposal is approved by Senate. After the NOI is submitted, a contact person should begin working to complete this form. Contact persons should work with OSPIE to identify the program's degree designation and CIP, as well as to solicit a letter of administrative feasibility from the Provost (per SR 3.2.3.A.2).

Pre-proposal. The CPE requires that a pre-proposal be submitted after a proposed program has achieved approval at the college level. Answers to questions identified with a * by the question number on this form will be used by OSPIE staff to submit the pre-proposal to the CPE (Council on Postsecondary Education).

Form structure. This form has two sections. The first half (white background) contains information required by the University Senate and Registrar's office and the second half (beige/brown background) contains information required by two external entities, the CPE and SACSCOC (Southern Association of Colleges and Schools Commission on Colleges). Although only the first half is required for University Senate approval, every question must be answered to receive CPE approval. Please do not leave any area blank, but instead write "not applicable" wherever that is the appropriate response.

Approval process. Once approved at the college level, your college will send the proposal to the appropriate Senate academic council (possibly HCCC and/or GC) for review and approval. Once approved at the academic council level, the academic council will send your proposal to the Senate Council office for additional review via a committee and then to the SC and Senate. (The contact person listed on the form will be informed when the proposal has been sent to committee and other times as appropriate.) Once approved by the Senate, the Senate Council office will submit the proposal for it to be placed on an agenda for the Board of Trustees. After approval by the Board, OSPIE will ensure the proposal is submitted to the CPE for final approval. Generally, a new program proposal must have received approval from the Senate by early spring (February or March) in order for the new program to be effective for the following fall semester.

² Visit http://dataportal.cpe.ky.gov/cpedegreedesignations.aspx for the CPE's list of approved degree designations.

³ The effective date is the anticipated date of the first student(s) being enrolled in the program.

⁴ Programs are effective the semester following approval. No program will be made effective unless all approvals, up through and including Board of Trustees and CPE approval, are received.

2b

List the program objectives of the proposed program. These objectives should deal with the specific institutional and societal needs that the program will address, such as how students will benefit from the program, both tangibly and intangibly. (Please note that "program objectives" are different from "student learning outcomes.") (300 word limit)

From a societal perspective, the program's focus is a direct response to the urgent need within the Commonwealth of Kentucky, region, and nation to address large and persistent deficiencies in the accessibility, quality, and costs of health services. Health care policy makers, providers, and practitioners require a larger base of evidence on how best to organize, finance, and deliver health services to improve health system performance. Closing these gaps requires new approaches for organizing, financing, and delivering health services that can only be identified through timely and insightful health services research. The proposed Ph.D. in Health Services Research program's 3 overarching objectives for program graduates are to:

- 1. Conduct creative and independent research on the organization, financing, and delivery of health services.
- 2. Advance their careers in the field of health services research in academic, private, or governmental settings.
- 3. Contribute to improvements in health system performance and population health.

2c*

List the intended student learning outcomes (SLOs) for the proposed program. Address one or more of the five areas of learning: 1. broad, integrative knowledge; 2. specialized knowledge; 3. intellectual skills; 4. applied learning; and 5. civic learning. (300 word limit) (More detailed information will be addressed in a subsequent question.)

- 1. Understand critical health services research issues, including access, quality, and efficiency.
- 2. Apply theoretical knowledge and conceptual models in support of health services research.
- 3. Describe key issues and methods in a concentrated substantive area, such as health economics or health outcomes.

2d

Describe the rationale and motivation for the program. Give reference to national context, including equivalents in benchmark institutions. (150 word limit)

The primary professional association for health services, AcademyHealth, lists only 20 PhD in Health Services Research programs (among 44 PhD programs in Health Services Research or related programs in Health Policy and Management, Health Services, and Health Services Organization and Policy) on its website at https://www.academyhealth.org/page/hsr-training-programs. The proposed PhD in Health Services Research at the University of Kentucky program is modeled after several existing training programs at other universities across the country, including the University of Michigan (PhD in Health Services Organization and Policy; University of North Carolina and University of California-Los Angeles (PhD in Health Policy and Management); and University of Washington (PhD in Health Services). Graduates from these existing programs are in high demand by academic research centers, federal and state health agencies, nonprofit health and social policy organizations, hospital systems and health insurers, consulting firms, and health care foundations across the country.

2e

Describe the proposed program's uniqueness within UK. (250 word limit)

There are no masters-level or doctoral-level training programs in Health Services Research at The University of Kentucky. The College of Public Health offers a Dr.P.H. in Health Management and Policy, but is currently phasing out the Dr.P.H. degree because most of its graduates in recent years have pursued careers in health services research. There or also no PhD in Health Services Research programs within the state of Kentucky. As a consequence, very few doctorally prepared health services researchers are currently practicing in Kentucky and the capacity for conducting applied research studies within Kentucky's health system is extremely limited.

2f

Describe the target audience. (150 word limit)

The proposed Ph.D. in Health Services Research will fill an important niche in graduate health professions education in Kentucky and the region that is not addressed by other existing or planned degree programs within

| | the College of Public Health or elsewhere at the University of Kentucky. The program's target audience will include Master's trained individuals working in research positions in health care systems (e.g., UK Health Care), | | | | | | | | |
|-----|---|--------------------------------|---------------------|--|--|--|--|--|--|
| | | | | | | | | | |
| | health insurance organizations (e.g., Humana and Blue Cross/Blue Shield), and government (e.g., offices of a State | | | | | | | | |

NEW <u>DOCTORAL DEGREE</u> Page 5 of

⁷ For questions about alternative delivery modes, please contact UK's Distance Learning Programs and e-Learning office (http://www.uky.edu/DistanceLearning/).

⁸ Per the Southern Association of Colleges and Schools Commission on Colleges (SACS) definition of distance education, distance education is a formal educational process in which the majority of the instruction (interaction between students and instructors and among students) in a course occurs when students and instructors are not in the same place. Instruction may be synchronous or asynchronous.

| 4. U | C Resources | | | | | | | | | |
|------|--|-----------------|-------------|--|--|--|--|--|--|--|
| 4a* | Will the program's home educational unit require new or additional faculty? (Pre-proposal question: Quality, 6 and Cost, B) | Yes 🗌 | No 🖂 | | | | | | | |
| | If "Yes," provide a plan to ensure that appropriate faculty resources are available, either within UK or externally, to support the program. Note whether the new and additional faculty will be part-time or full-time faculty. If "No," explain why. (150 word limit) | | | | | | | | | |
| | The Department of Health Management and Policy has sufficient faculty to support the PhD in Health Services Research program. | | | | | | | | | |
| | If "Yes," when will the faculty be appointed? (150 word limit) | | | | | | | | | |
| | | | | | | | | | | |
| | | I | I | | | | | | | |
| 4b | Will the program's home educational unit require additional non-faculty resources, e.g. classroom space, lab space, or equipment? (Pre-proposal question: Cost, B) | Yes 🗌 | No | | | | | | | |
| | If "Yes," provide a brief summary of additional non-faculty resources that will be needed t program over the next five (5) years. If "No," explain why. (150 word limit) | o implement | this | | | | | | | |

5. Assessment – Program Assessment and Student Learning Outcomes (SLOs) Referring to program objectives, student benefits, and the target audience (questions 2b and 2f), explain how the program will be assessed, which is different from assessing student learning outcomes. Include how the 5a faculty of record will determine whether the program is a success or a failure. List the benchmarks, the assessment tools, and the plan of action if the program does not meet its objectives. (250 word limit) The program objectives described earlier pertain to students graduating from the program. Students should be able to: 1. Conduct creative and independent research on the organization, financing, and delivery of health services. 2. Advance their careers in the field of health services research in academic, private, or governmental settings. 3. Contribute to improvements in health system performance and population health. These program-level objectives will be assessed through surveys of alumni (to assess their self-reports of abilities and accomplishments relative to each objective) and a search of articles published by alumni every 3 years. The program faculty will also review and evaluate secondary indicators of the program's success, including the mean number of years to graduation, percentage of students not graduating, and percentage of students not passing the qualifying examination. The program faculty will adjust the curriculum, advising, and mentoring as needed to assure that graduating students are able to satisfy the program objectives. (related to section 15) Append an assessment plan¹⁰ for the SLOs to the end of this form. (Click HERE for a 5b sample assessment plan.) Explain how the curriculum achieves the program level student learning outcomes by describing the relationship 5c between the overall curriculum or the major curricular components and the program objectives. (300 word limit) The newly developed HSR courses cover all of the required SLOs and program competencies. HSR 700 Health Services Research and Theory introduces students to critical HSR theories, concepts, and issues (SLO 1), the critical evaluation of articles and the review and synthesis of the HSR literature. HSR 701 Health Services Journal Club reinforces all three SLOs. HSR 705 Health Services Research and Theory reinforces SLOs 1-3 and introduces students to the application of HSR conceptual models, development and testing of hypotheses, selection of appropriate study designs, analysis of data, identification of ethical concerns, and interpretation and explanation of statistical findings. HSR 720 Directed Research reinforces SLOs 1-3 and introduces key substantive areas (e.g., health economics or health outcomes) and the writing of articles. HSR 725 Developing Proposals in Health Services Research introduces the writing of grant proposals. Students who satisfactorily complete all components of the curriculum will be prepared to successfully achieve the HSR program's 3 overarching objectives for program graduates, which are to 1. Conduct creative and

Append a PDF of the program's course map¹¹ to the end of this form. (Click <u>HERE</u> for a sample curricular map.)

the field of health services research in academic, private, or governmental settings; and 3. Contribute to

independent research on the organization, financing, and delivery of health services; 2. Advance their careers in

improvements in health system performance and population health.

5d

NEW DOCTORAL DEGREE Page 9 of 32

¹⁰ An assessment plan is typically a tabular grid that illustrates the artifacts, rubrics, assessment team, and periods of assessment for the SLOs.

¹¹ Course mapping (or "curricular mapping") is a representation of how faculty intend to approach and assess each of the student learning outcomes identified for the courses for the degree program, with an emphasis on courses required for all degree candidates. It is a master chart that indicates which objectives are being met, to what extent, and how often. This identifies whether an objective is "introduced," "developed," and/or "mastered" within a given course; it may be helpful also to chart any classroom-based assessment measures used to demonstrate that claim.

| 5e | (related to 2c) Based on the SLOs from question 2c, which components will be evaluated, i.e. course mapping? For each student learning outcome identify in which courses it is covered in the curriculum and note whether employers, students, alumni, and/or faculty outside of the program were involved in the development of student learning outcomes. (300 word limit). |
|------|---|
| | Please see the Assessment Plan and Course Map appended to this form. Each of the SLOs corresponds to a required HSR course. The Course Map indicates whether each SLO is Introduced, Reinforced, or Mastered in each required HSR course. Persons outside of the program were not involved in the development of SLOs. Rather, we developed SLOs similar to those established by peer PhD in HSR programs at other universities. |
| 5f | When will components be evaluated? Identify the review cycle for each student learning outcome. (e.g, every semester or each year) (150 word limit) |
| | As indicated in the Assessment plan appended to this form, we will regularly conduct formative and summative assessments for each SLO. Formative assessment data (i.e., course grades) will be collected by each faculty member and reported to the DGS each semester. Summative assessment data (i.e., candidacy examinations, dissertation proposals, and dissertations) will be assessed by the student's doctoral committee and reported to the DGS each semester. The DGS and PhD program faculty will review the assessments annually, or following the conclusion of spring semesters. |
| 5g | When will the data be collected? (This may or may not be different from when the assessment is <i>conducted</i> .) (150 word limit) |
| | As indicated in the Assessment Plan appended to this form, we will regularly conduct formative and summative assessments for each SLO. Formative assessment data (i.e., course grades) will be collected by each faculty member and reported to the DGS each semester. Summative assessment data (i.e., candidacy examinations, dissertation proposals, and dissertations) will be assessed by the student's doctoral committee and reported to th DGS each semester. |
| 5h | How will the data be collected? (150 word limit) |
| | Instructors will select specific assignments and test questions to assess formatives SLOs and report the data to the DGS. The student's doctoral committee will collect summative assessment data during the candidacy/qualifying examination, dissertation proposal, and dissertation and report the data to the DGS. |
| 5i | What will be the benchmarks and/or targets to be achieved? (150 word limit) |
| | The formative assessment benchmark will be 95% of students passing the courses for a given SLO with a mean grade of a B or better. The summative assessment benchmark will be 95% of students passing the candidacy/qualifying examination, dissertation proposal, and dissertation. |
| 5j | What individuals or groups will be responsible for data collection? (150 word limit) |
| | Course instructors will collect the formative assessment data and provide the data to the DGS for aggregation and review. Similarly, doctoral committees will collect the summative assessment data and provide the data to the DGS for aggregation and review. |
| 5k | How will the data and findings be shared with faculty? (150 word limit) |
| JK . | The DGS will share the findings with the PhD program faculty for review annually. |
| 51 | How will the data be used for making programmatic improvements? (150 word limit) |
| | The PhD program faculty will use the data to make changes to courses or the curriculum as warranted. |
| 5m | What are the measures of teaching effectiveness? (150 word limit) |
| | Evaluations of teaching effectiveness differs from program and student learning outcome evaluations. Program instructors will be individually assessed using TCEs and peer review according to processes put in place by the department and college. If TCE assessments indicate a deficiency in teaching effectiveness for a course, the DGS |

NEW <u>DOCTORAL DEGREE</u> Page 10 of

| | will share that information with the Department Chair to raise with the instructor during part of the regular performance review process. | | | | | | | |

INFORMATION REQUIRED BY CPE AND SACS

11c*

11. Program Overview – Program Quality and Student Success

Highlight any distinctive qualities of the proposed program. Are any faculty nationally or internationally recognized for expertise in this field? Does this program build on the expertise of an existing locally, nationally, or internationally recognized program at UK? (300 word limit)

Although there is currently no health services research training program on campus, numerous faculty across campus have expertise in health services research. The proposed PhD in Health Services Research program will take advantage of health services research expertise in the College of Public Health as well as the Colleges of Pharmacy, Medicine, and Gatton College of Business and Economics. The College of Public Health has internationally known faculty in the areas of rural health services research, value-based purchasing, health insurance, addition health services research, and comparative effectiveness research. The College of Pharmacy has internationally known faculty in the areas of pharmacoeconomics, claims data analysis, and addition health services research; it also houses large insurance administrative claims datasets from Kentucky Medicaid and Humana. The Gatton College of Business and Economics includes internationally known faculty members in the area of health economics, including individuals with expertise on the effects of the Affordable Care Act, or ACA. The College of Medicine includes internationally known faculty in the areas of health care quality and improvement and houses the Center for Health Services Research. Of key importance, students in the PhD in Health Services Research program will gain real-world and applied experiences by completing directed research projects under the tutelage of faculty members from faculty members in these various areas. These applied experiences will distinguish the UK PhD in Health Services Research program from many of its peers nationally and better prepare graduates for careers as creative and independent researchers working across academic, health care system, health insurance, and governmental settings.

11b* Clearly state the student admission, retention, and completion standards designed to encourage high quality. (300 words)

Admissions: Master's GPA of 3.25 or higher. Successful applicants will have a Master's degree in the social sciences or advanced clinical degree that included courses in biostatistics/statistics and/or epidemiology. Retention: The program director will connect each student to an advisor that matches the student's interests. Each student will work with 1 or more faculty members on an applied research project as part of directed research credits. This one-on-one tutelage will assure that the student is competent in the development, conduct, interpretation, and description of a health services research study.

Completion. Students will be required to maintain at least a 3.25 GPA. Each student will be required to successfully complete all course work before completing a written and oral qualifying examination written/led by a committee of graduate faculty members. Each student must pass the qualifying examination or successfully complete remedial courses or assignments before proceeding to the dissertation. Each student must successfully complete a dissertation overseen by a committee of faculty members per Graduate School policies.

Describe how the proposed program will articulate with related programs in the state. Include the extent to which student transfer has been explored and coordinated with other institutions. Note: Convert all draft articulation agreements related to this proposed program to PDF and append to the end of this form. (300 word limit)

The University of Louisville School of Public Health and Information Sciences offers a PhD in Public Health Sciences with a Specialization in Health Management and Policy. The University of Louisville program is not as analytical (it has concentrations in organizational studies and health policy) and thus differs substantially from the proposed PhD in Health Services Research.

11d* Identify the applicant pool and how applicants will be reached. (300 word limit)

Applicants will include Master's trained researchers working in academia (e.g., university academic medical centers), government (e.g., state health departments and Medicaid agencies), and insurance (e.g., Humana). We have already received several inquiries and anticipate additional demand from other Master's trained researchers at UK Health Care. We will also host regular research seminars to attract interest in the program. We also anticipate some initial demand from Master's trained researchers at Kentucky state offices. We will further advertise the program to Master's trained researchers via communications with faculty collaborators at UK Health Care, the Center for Health Services Research, as well as the Markey Cancer Center, Center on

NEW DOCTORAL DEGREE Page 19 of

Drug and Alcohol Research, and Kentucky Department of Health. We will also advertise the program in the AcademyHealth listing of PhD in Health Services Research programs.

12. Mission: Centrality to the Institution's Mission and Consistency with State's Goals (related to 2b) Explain how the program objectives support at least two aspects of UK's institutional mission 12a* and academic strategic plan? (150 word limit) The Ph.D. in Health Services Research directly pertains to and advances 2 of UK's 5 strategic objectives - 1. Graduate Education and 2. Research and Scholarship. Regarding Graduate Education, the Ph.D. in Health Services Research will help to "Strengthen the quality and distinctiveness of our graduate programs to transform our students into accomplished scholars and professionals who contribute to the Commonwealth, the nation, and the world through their research and discovery, creative endeavors, teaching, and service." Regarding Research and Scholarship, the program will "Expand our scholarship, creative endeavors, and research across the full range of disciplines to focus on the most important challenges of the Commonwealth, our nation, and the world." (related to 2b) How do the program objectives support at least two aspects of the Council on Postsecondary 12b* Education's (CPE) Strategic Agenda and the statewide implementation plan? (300 word limit) The Ph.D. in Health Services Research directly pertains to and advances 2 of the CPE's stated strategic objectivs - Objectives 9 and 10. Regarding Object 9, the program will help to "Improve the career readiness and employability of postsecondary education graduates" by producing graduates in a timely and high demand field. Regarding Objective 10, the program will help to "Increase basic, applied, and translational research to create new knowledge, accelerate innovation, and promote economic growth" by producing graduates who have the requisite skills to conduct research that may be applied to improve the accessibility, quality, and costs of health services in the state. If an approval letter from an Education Professional Standards Board (EPSB) is required, check the box and 12c* append a PDF version of the letter to this form. (e.g. any program leading to teacher, principal, or superintendent certification, or rank change) 13. Resources How will the program support or be supported by other programs within the institution? For example, shared 13a faculty, shared courses, collaborative research, etc. (300 word limit) The program curriculum is interdisciplinary and includes numerous existing courses at UK., including courses offered by the Department of Economics, College of Education (Department of Education Policy Studies and Evaluation and Department of Educational, School, and Counseling Psychology), College of Public Health (Department of Biostatistics and Department of Epidemiology) and College of Pharmacy (Institute for Pharmaceutical Outcomes and Policy. 13b* What will be the projected "faculty-to-student in major" ratio? (150 word limit) The projected facutly to student ratio is 5 core faculty members per 2-6 new students per year. The 5 core faculty members are in the Department of Health Management and Policy and will be responsible for serving as mentors for students' Directed Study and Dissertation credits. Describe the library resources available 19 to support this program. Access to the qualitative and quantitative library resources must be appropriate for the proposed program and should meet recognized standards for 13c* study at a particular level or in a particular field where such standards are available. Adequacy of electronic access, library facilities, and human resources to service the proposed program in terms of students and faculty will be considered. (300 word limit) The UK library resources are more than adequate to support the proposed program. The UK library already has subscriptions to the numerous journals in the field of health services research.

NEW DOCTORAL DEGREE Page 20 of

¹⁹ Please contact OSPIE (OSPIE@L.uky.edu) for more information.

Describe the physical facilities and instructional equipment available to support this program. Physical facilities 13d and instructional equipment must be adequate to support a high-quality program. Address the availability of classroom, laboratory, and office space, as well as any equipment needs. (300 word limit) The College of Public Health has adequate class room space for class meetings. Several faculty members will employ students as research assistants and have available cubicles in the Healthy Kentucky Research Building. 14. Demand and Unnecessary Duplication Provide justification and evidence to support the need and demand for this proposed program. Include any data on student demand, career opportunities at any level, or any recent trends in the discipline that necessitate a new program. (300 word limit) This evidence is typically in the form of surveys of potential students and enrollments in related 14a programs at the institution. Anecdotal evidence is insufficient. Demonstrate a systematic collection of data, thorough study of the data, and a reasonably estimated student demand for the program. Provide evidence of student demand at state and national levels 14b Clearly state the degree completion requirements for the proposed program. (150 word limit) The program requires 54 credit hours of coursework in 4 core areas (1. Health Services Research, Theory, and Concepts; 2. Research Methods; 3. a Disciplinary Concentration area; and 4. Directed Research in a Substantive Area), an elective course, grant writing, and dissertation work. The program offers students a choice between two disciplinary concentrations, health economics or health outcomes. Students successfully completing the coursework and achieving the minimum grade point average will be required to pass a written and oral doctoral candidacy examination demonstrating mastery of all 4 core areas of coursework described above before progressing to dissertation work. As part of the dissertation research process, candidates must successfully develop and defend a written proposal of their dissertation research and subsequently develop and defend a written monograph or 3 manuscripts of their dissertation research. Will this program replace or enhance any existing program(s) or tracks (or 14c No 🔀 Yes concentrations or specializations) within an existing program? If "Yes," explain. (300 word limit) 14d Identify the primary feeders for the program. (150 word limit) Feeder programs include state, regional, and national master's programs in public health (e.g., MPH and MS degrees from schools and programs in public health), economics, sociology, and other social sciences. Graduates of health sciences programs (e.g., M.D. and Pharm.D.) who are interested in obtaining advanced health services research skills may also seek the degree. 14e Describe the student recruitment and selection process. (300 word limit) The Director of Graduate Studies and program faculty members will be responsible for the recruitment and selection of students. The Director of Graduate Studies and at least 2 other members of the program facutly will review each application and vote on a recommendation regarding admission. The College of Public Health's Academic Affairs office will assist in student recruitment as part of its regular recruitment activities. The Director of Graduate Studies and program facutly will also personally recruit students in their areas of expertise into the program. 14f Specify any distinctive qualities of the proposed program. (300 word limit) The major distinctive quality of the program is the opportunity for students to engage in research with faculty mentors. Students will be required to complete Directed Study credits under the mentorship of faculty mentors

alternative existing credentials and employers' willingness to pay higher salaries to graduates of the proposed program. (300 word limit)

A 2018 article by Frogner, "Update of the Stock and Supply of Health Services Researchers in the United States" in the journal entitled Health Services Research provided statistics on the growth in health services researchers from 2007 to 2015. According to this article, the estimated range in the mean annual growth rate for health services researchers falls was between 2.9 and 4.7 percent from 2007 to 2015. The author points out that the National Research Council Committee to Study the National Needs for Biomedical, Behavioral, and Clinical Research Personnel recommends that growth in the number of health services researchers be similar to annual growth in national health expenditures, which were within the range of growth for health services researchers from 2007 to 2015.

A recent peer-reviewed article by Brown et al. (2018), "Employment Trends among Public Health Doctoral Recipients, 2003-2015," published in the American Journal of Public Health provides information about employment status outcomes related to health services research. Based on analyses of the National Science Foundation's Survey of Earned Doctorates, the authors found 77.3% of graduates of public health doctoral programs with a concentration in health services administration had secured or were negotiating employment.

Several recent graduates of the DrPH in Health Management and Policy program at the University of Kentucky, including alumni now working in research positions for the federal government, have shared with us that they would have preferred a PhD in Health Services Research because it would have better prepared them for their careers.

Describe the types of jobs available for graduates, average wages for these jobs, and the number of anticipated openings for each type of jobs at the regional, state, and national levels.

The Frogner article mentioned above also reported on the industries where health services researchers work. According to statistics based on the AcademyHealth membership directory, approximately 51% of members worked in academia, 11% worked in a non-academic research or policy organization, 4% worked in government, and the remaining worked for state government, pharmaceutical companies, foundations, consulting companies, and other sectors. According to statistics based on information from LinedIn.com, the 3 most common job functions for health services researchers were research, education, and health care services.

Regarding current demand, the AcademyHealth career website for health services researchers listed 3 advertised positions available in Kentucky, 6 in the region (states with SEC schools and Indiana, Ohio, and West Virginia), and 48 nationally on 10/9/2019 alone.

Because the majority of health services researchers enter academia, we report here average salaries for professors at institutions that employ health services researchers. According to data from the Association for Schools and Programs in Public Health, the mean salaries for a full professor in a department of health policy and management (where many health services researchers work) was \$210,431 in 2018. Some health services research faculty members may work in academic medical settings. As another example, according to data from Texas Tribune, the median salaries for health services researchers at the University of Texas MD Anderson Cancer Center are \$98,000 at the assistant professor rank and \$237,000 at the full professor rank.

15. Assessment and Oversight

15a*

15b

Describe *program* evaluation procedures for the proposed program. These procedures may include evaluation of courses and faculty by students, administrators, and departmental personnel as appropriate. Program review procedures shall include standards and guidelines for the assessment of student outcomes implied by the program objectives and consistent with the institutional mission. *(300 word limit)*

The HSR program faculty will meet annually to review application, admission, and matriculation numbers; SLO assessment data; student progression and graduation rates; student and peer evaluations of courses; graduates' career placements; and alumni surveys of the program's performance. The College of Public Health's Academic Affairs Office will assist in the collection of data indicators.

Describe how each program-level student learning outcome will be assessed and how assessment results will be used to improve the program. (300 word limit)

NEW DOCTORAL DEGREE Page 24 of

The student learning outcomes for the program (SLOs) pertain to the knowledge and skills that students will possess upon graduation. The SLOs are:

vices research issues, including access, quality, and efficiency.

- 1. Understand critical health services research issues, including access, quality, and efficiency.
- 2. Apply theoretical knowledge and conceptual models in support of health services research.
- 3. Describe key issues and methods in a concentrated substantive area, such as health economics or health outcomes.

The SLOs matched to required HSR courses are shown in an Appendix Table. SLOs will be assessed by course assignments, course examinations, qualifying examinations, dissertation proposals, and dissertations. The Director of Graduate Studies, with assistance from the College of Public Health's Academic Affairs Office, will collect information about the SLOs from individual instructors. The Health Services Research faculty and Director of Graduate Studies will meet annually to review and evaluate SLOs, identify any concerns and weaknesses, and modify the curriculum and courses as warranted.

| This course explores the theory and methods of measuring the performance and quality of pharmaceutical health outcomes emphasizing evidence-based practice and quality improve- ment approaches. Particularly, the course focuses on the use of data and information systems to measure quality, performance, and outcomes. Topics covered include designing and testing outcome based measures, measuring and evaluating satisfaction, measuring and evaluating treatment, risk adjustment, survey methods, patient records, encounter data, administrative data, claims data, and an assessment of the current outcome based standard National Committee on Quality Assurance, IEDIS 2009 PPS 710 Course not yet listed in bulletin. This course will provide students with an overview of the theory and applications of advanced quantitative methods. A quantitative research method focuses on advanced quantitative methodologically-oriented studies in educational research, evaluation, and statistics. The goal of this course is to prepare students to analyze data using advanced quantitative methods. It covers topics in the areas of multilevel modeling, data mining, missing data, categorical data analysis, meta-analysis, and longitudinal data analysis. Other specific analysis techniques may also be explored. Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. This course can be repeated for up to 12 credit hours This course will provide studies with an overview of the theory and applications of advanced psychometric methods. A psychometric method focuses on advanced psychometric methodologies used in methodologically-oriented studies with an overview of the theory and applications of advanced psychometric methods. NEW <u>DOCTORAL DEGREE</u> Page 32 of

College of Public Health

February 5, 2020

Jennifer Bird-Pollan UK Senate Council Chair 203 E Main Building Lexington, Kentucky

Dear Professor Bird-Pollan,

Please accept this letter of support for the implementation of a Doctoral Degree in Health Services Research (PhD HSR) in the College of Public Health (CPH). Our CPH Faculty Council approved this program on December 2, 2019.

The proposed PhD HSR program was designed to provide students with the theoretical and methodological foundations necessary to conduct creative and independent research on these issues with the ultimate goal of identifying evidence-based policy and management pathways to improve health care access, quality, and costs. The program will fill an important niche in graduate health professions education in Kentucky and the region that is not addressed by other existing or planned degree programs within the CPH or elsewhere at the University of Kentucky.

At present, CPH is well-situated to efficiently and effectively offer the PhD HSR degree. We have placed our DrPH program on hiatus and most students in that program will complete degree requirements by May 2020. Thus, our fiscal modeling illustrates that CPH has financial resources to invest in, and support, the program. Internal feasibility assessments demonstrated CPH's ability to offer an academically rigorous degree program.

In summary, offering a PhD HSR degree is feasible given CPH resources; supported by CPH faculty and staff; and, meets a unique academic market need. And, perhaps most importantly, this endeavor is consistent with the mission and values of CPH, specifically, and the University of Kentucky, more broadly.

If I can provide additional information, please don't hesitate to contact me.

Sincerely,

Donna K. Arnett, PhD
Dean and Professor

Dear Ty Borders,

Thank you for submitting an Early Notice for **Health Services Research**, **PhD**, **Doctor of Philosophy** (51.2299).

My email will serve 2 purposes: 1.) Next steps for SACSCOC, and 2.) Verification and notification that you have contacted OSPIE—a Senate requirement for proposal approval.

- 1. Next steps for SACSCOC: None required
- 2. **Verification that OSPIE has reviewed the proposal:** Based on the documentation presented the proposed program does not constitute a substantive change as defined by the University or SACSCOC, the university's regional accreditor. Therefore, no additional information is required by the Office of Strategic Planning & Institutional Effectiveness at this time. The proposed program change(s) may move forward in accordance with college and university-level approval processes.

IMPORTANT: Certificates (undergraduate and graduate) will be added to the CPE Inventory once they have been approved by the University Senate. For degree programs, an NOI will be submitted by the Office of Strategic Planning and Institutional Effectiveness to CPE and you will need to work closely with our office to ensure that your proposal meets all external CPE requirements and deadlines.

Should you have any questions or concerns about UK's substantive change policy and its procedures, please do not hesitate to contact our office.

Appendix

Disciplinary Concentrations (12 credit hours). The program offers students a choice between two disciplinary concentrations: (1) <u>health economics</u> or (2) <u>health outcomes</u>. The health economics concentration includes courses on microeconomic theory and methods for economic evaluation. The health outcomes concentration includes courses on health outcomes measurement and comparative effectiveness research.

a. Health Economics Concentration

Required concentration course:

ECO 725 Health Economics or CPH 658 Health Economics (3 credit hours)

Concentration electives (Students select 3 courses from below or other courses with approval by the DGS):

ECO 601 Advanced Microeconomic Theory (3 credit hours)

ECO 724 Environmental Economics (3 credit hours)

ECO 751 Public Economics (3 credit hours)

b. Health Outcomes Concentration

Required concentration courses:

HSR 710 Health Outcomes Res. Design, Measurement, and Analysis (3 credit hours)

HSR 715 Comparative Effectiveness Research (3 credit hours)

Concentration electives (Students select 2 courses from below or other courses with approval by the DGS):

CPH 713 Pharmacoepidemiology (3 credit hours)

PPS 700 Introduction to Pharmaceutical Outcomes and Policy (3 credit hours)

KHP 673 Health Promotion and Behavior Change (3 credit hours)

KHP 677 Health Promotion and Program Planning (3 credit hours)

Academic Degree Programs University of Kentucky

INSTRUCTIONS

The faculty of each academic program, degree or certificate, are asked to complete this plan template during the 2019-20 academic year to guide assessment of the program-level student learning outcomes (PSLOs) during the <u>upcoming cycle</u>. Assessment plans are due to the Office of Strategic Planning & Institutional Effectiveness (OSPIE) no later than **April 15, 2020** and should be submitted to the appropriate college and program folder in <u>SharePoint</u>.

A <u>Quick Start Guide and other documentation</u> as well as dates for live <u>training sessions</u> are provided on the OSPIE website. Training resources and session topics range from an overview of the new assessment process to principles and practice for student learning outcome assessment. Questions can be directed to <u>OSPIE staff</u>.

Reading the Quick Start Guide prior to completing the new plan template is strongly encouraged.

| ABOUT THE PROGRAM | |
|--|---|
| College or School (example: College of Arts & Sciences) | College of Public Health |
| Degree Type (example: BA or MS) | PhD |
| Program Name (example: History) | Health Services Research |
| | If one does not currently exist, provide the department or college mission statement. |
| ine mission of the College of Public Health is to develop his improve health in Kentucky and beyond. | ealth champions, conduct multidisciplinary and applied research, and collaborate with partners to |
| improve neutrin Kentucky and Beyona. | |
| | |
| (Optional) Include any additional information about the curriculum and how student learning is assessed. | program's history, development, or structure that may be beneficial in understanding the |

Academic Degree Programs University of Kentucky

ASSESSMENT CYCLE

All programs that do not have specialized accreditation and are not located in a department/college with a specialized accreditation should follow a <u>4-year PSLO assessment cycle</u>. Programs that have specialized accreditation(s) or are within a college that has a comprehensive accreditation can develop an alternate PSLO and periodic review cycle in consultation with OSPIE.

| Which | n cycle will the program being using? |
|-------------|--|
| \boxtimes | 4-year cycle [What does this look like?] |
| П | Other (accredited programs/departments only) |

If the program has selected "other" for the assessment and periodic review cycle, please append a copy of the proposed cycle and a brief justification to this plan.

ASSESSMENT COORDINATION AND RESOURCES

Individual(s) coordinating program-level student learning outcomes assessment

| First and Last Name | Title/Position | Email |
|---------------------|------------------------------|--------------------|
| Dr. Tyrone Borders | Director of Graduate Studies | Ty.borders@uky.edu |
| | | |
| | | |

Other individuals providing oversight, coordination, or support for assessment

| First and Last Name | Title/Position |
|---------------------|--|
| Andrea Perkins | Director of Accreditation and Assessment |
| | |
| | |

Academic Degree Programs University of Kentucky

| Optional) Other utilized resources for assessment (e.g. software such as rubrics or portfolios, evaluator stipends, etc.) | | | | | | | | | |
|---|--|--|--|--|--|--|--|--|--|
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |

PROGRAM-LEVEL STUDENT LEARNING OUTCOMES

Please list the program-level student learning outcomes (PSLOs). If applicable, indicate which, if any, outcomes are required by your specialized accreditor(s) [What is this?]. Bachelor's degree programs must also indicate which outcome(s) map to the university's GCCR (Graduation Composition & Communication Requirement). The GCCR is not a requirement for certificates, graduate, or professional programs.

Space for up to 10 PSLOs has been provided below, but this does not imply that 10 outcomes are required. Program faculty should decide the appropriate number based on the design of the curriculum. Most programs have 3-8 outcomes, depending on the length of the program. If more than 10 lines are needed, either insert more lines into the table or submit a request to OSPIE@uky.edu for a template with additional lines for PSLOs.

| PSLO# | Program-level Student Learning Outcome Statement (How should these be written?) | Required by Specialized Accreditor(s)? | Mapped to GCCR? (Undg degrees only) |
|---------|---|--|---|
| Example | Graduates will be able to critically evaluate scientific literature related to drugs and disease to enhance clinical decision-making. | | |
| 1 | Understand critical health services research issues, including access, quality, and efficiency. | | |
| 2 | Apply theoretical knowledge and conceptual models in support of health services research. | | |
| 3 | Describe key issues and methods in a concentrated substantive area, such as health economics or health outcomes. | | |

Academic Degree Programs University of Kentucky

Please provide a brief description of the process used to develop or revise current PSLOs and the extent to which program faculty were involved. If applicable, provide discussion of any attempts to align PSLOs with professional or accreditation standards, employer expectations and job skills, graduate program curricula, etc. If PSLOs are taken directly from an accreditor, discuss whether (and how) the PSLO statements were reviewed by the faculty to ensure they were comprehensive.

The PSLOs were developed by proposed PhD in Health Services Research (HSR) faculty members in the Department of Health Management and Policy, including Drs. Borders, Benitez, Sohn, and Waters. The PSLOs were selected after reviewing student learning outcomes and curricula at more established HSR programs (i.e., the University of North Carolina, University of Washington, and University of Michigan), as well as evidence about employer needs and demands (i.e., peer reviewed articles about the HSR workforce).

CURRICULUM MAP

Please create a map of the PSLOs to the curriculum. All required courses should be included in the left-hand column, and all PSLOs should span across the remaining columns. If desired, specific elective courses or elective "tracks" can be included (recommended). The purpose of the curriculum map is to show where each PSLO is emphasized within the curriculum. The level at which each PSLO is taught within a given course should be indicated as follows: introductory (I); reinforced (R); or mastery (M). Each PSLO should have at least an instance of I, R, and M across the curriculum, with the exception of certain graduate programs where introductory knowledge is provided at the undergraduate level. For assistance in developing a curriculum map, please visit the OSPIE website or contact the OSPIE team.

| Course | PSLO1 | PSLO2 | PSLO3 | | | | | |
|--|-------|-------|-------|--|--|--|--|--|
| HSR 700 Health Services Research and Theory | I | I | I | | | | | |
| HSR 701 Health Services Research Journal Club | R | R | R | | | | | |
| HSR 705 Health Services Research Methods | R | R | R | | | | | |

Academic Degree Programs University of Kentucky

| HSR 720 Directed Research | R | R | R | | | | | |
|---|---|---|---|--|--|--|--|--|
| HSR 725 Developing Proposals for Health Services Research | M | M | M | | | | | |

I = Introduced; indicates that students are introduced to the outcome

ASSESSMENTS

Please complete the chart below by listing each assessment on a separate row, and including the requested information. Except for outcomes that focus on students' values or beliefs, at least 1 assessment should be <u>direct</u>. Ideally, all outcomes should have at least 2 assessments. <u>If available, append a copy of the assessment measure/instrument</u> (e.g. scoring rubric or sample questions) to this report. If a goal/target has already been set or can be set for a given measure/instrument, this should be included in the table. Otherwise, the program will need to determine and specify a target/goal when results are first reported for that instrument/measure. Note: space for only 15 instruments/measures have been provided. If space for additional assessment instruments/measures are needed, either insert additional rows into the table or contact <u>OSPIE staff</u> to receive a customized template with additional lines.

| Assessment Instrument/ Measure Name | PSLO(s) Mapped to | Assessme nt Type (Direct or Indirect) | Assessment Instrument/Measure Description (What is this?) | Assessment Instrument/Measure Rationale (What is this?) | Benchmark or Goal (If Available) (What is this?) | Course(s) (If applicable) | Rubric or Example Appended? |
|---|-------------------------|--|---|--|--|------------------------------|-----------------------------|
| Comprehensive Exam | 1-3 | Direct | Students will complete a comprehensive written and oral examination of their competency of the curriculum pertaining to PSLOs 1-3 after completing all required | This measure was selected because it provides a thorough assessment of each student's competencies and abilities prior to moving on to propose | 95% of students will earn a mean assessment of 2 or better (1=exceed expectations, | | \boxtimes |

R = Reinforced and opportunity to practice; indicates the outcome is reinforced and students afforded opportunities to practice

M = Mastery at the senior or exit level; indicates that students have had sufficient practice and can now demonstrate mastery

Program-level Student Learning Outcomes Assessment Plan Template Academic Degree Programs University of Kentucky

| Assessment Instrument/ Measure Name | PSLO(s) Mapped to | Assessme nt Type (Direct or Indirect) | Assessment Instrument/Measure Description (What is this?) | Assessment Instrument/Measure Rationale (What is this?) | Benchmark or Goal (If Available) (What is this?) | Course(s) (If applicable) | Rubric or Example Appended? |
|---|-------------------------|--|--|--|---|---|-----------------------------------|
| | | | courses, other than the dissertation. Each comprehensive examination committee member will complete an evaluation form about the student's performance corresponding to each PSLO (see rubric on last page). | and conduct original research. | 2=meets expectations, 3=below expectations) on each PSLO. | | |
| Dissertation proposal | 1-3 | Direct | Students will complete a dissertation proposal which will include a written proposal and an oral defense of the proposal. The proposal will be assessed by the dissertation faculty committee. Each committee member will complete a holistic evaluation form about the student's performance (see rubric on last page). | This measure was selected to assure that the student has demonstrated competencies and abilities required to perform/conduct the proposed dissertation research. | 95% of students will earn a mean of 3 or better on a holistic scale. | | |
| Dissertation | 1-3 | Direct | Students will complete a written dissertation of their research. The dissertation will be assessed by the dissertation committee. Each committee member will complete a holistic | This measure was selected to assure that the student has satisfactorily conducted an original research project and satisfied all of the required PSLOs. | 95% of students will earn a mean of 3 or better on a holistic scale. | HSR 730 Doctoral Dissertation Research | |

ASSESSMENT REPORTING CYCLE

Please complete the chart below by providing the requested information for each learning outcome. Note: space for up to 10 PSLOs has been provided. If space for additional PSLOs are needed, either insert additional rows into the table or contact the OSPIE staff to receive a customized template.

| PSLO# | Semester/ Year(s) Data Collected | Year(s) Results Submitted to OSPIE (see Results Report Definition) | Year(s) Reflection Report Submitted to OSPIE (see Reflection Report Definition) | Year(s) Action Report Submitted to OSPIE (see Action Report Definition) |
|-------|----------------------------------|--|---|---|
| 1 | Fall 2023 | Summer 2024 | Summer 2025 | Summer 2026 |
| 2 | Fall 2023 | Summer 2024 | Summer 2025 | Summer 2026 |
| 3 | Fall 2023 | Summer 2024 | Summer 2025 | Summer 2026 |

FEEDBACK AND SUPPORT ON PSLO ASSESSMENT PLAN

| can pr | orogram has the option of receiving formative feedback on its new or revised PSLO assessment plan from OSPIE staff members. OSPIE staff ovide suggestions for improvement to learning outcome statements, overall assessment plan design, curriculum mapping, standard setting, lual assessment tools, etc. If your program would like to receive feedback on its assessment plan, please indicate below: |
|--------|---|
| | Yes, we would like to receive feedback. |
| | No thank you, not at this time. |
| | e are questions the program director or faculty did not have the opportunity to ask prior to submission of the PSLO assessment plan, and you like to schedule a brief consultation with OSPIE staff, please indicate below: |
| | Yes, we would like to schedule an individual or group consultation. |
| | No thank you, not at this time. |

RUBRICS

<u>Comprehensive Examination Rubric</u>: For *each* PSLO corresponding to the Comprehensive Examination, each Comprehensive Examination Faculty member will evaluate the student's performance using the following rubric.

1=exceeds expectations, 2=meets expectations, 3=below expectations

<u>Dissertation Proposal Holistic Rubric</u>: For the PSLOs corresponding to the Dissertation Proposal, each Dissertation Committee Faculty member will evaluate the student's overall performance using the following holistic rubric.

Acceptable:

- 1 Approved with commendation, the level of scholarship in this dissertation proposal is exceptional.
- 2 Acceptable, all crucial elements are included and adequately described.
- 3 Approved, although revisions are strongly suggested in one or more important components that are of markedly lesser quality than the other sections. Comments on how to enhance quality are provided by the dissertation committee.

Unacceptable:

- 4- Must be revised and resubmitted because one or more essential components are not satisfactorily described.
- 5- Must be revised and resubmitted because one or more required elements are missing or previous requests for revision were ignored.

Academic Degree Programs University of Kentucky

<u>Dissertation Holistic Rubric</u>: For the PSLOs corresponding to the Dissertation, each Dissertation Committee Faculty member will evaluate the student's overall performance using the following holistic rubric.

Acceptable:

- 1 Approved with commendation, the level of scholarship in this dissertation is exceptional.
- 2 Acceptable as written, all crucial elements are included and adequately described.
- 3 Approved, although revisions are strongly suggested in one or more important components that are of markedly lesser quality than the other sections. Comments on how to enhance quality are provided by the dissertation committee.

Unacceptable:

- 4- Must be revised and resubmitted because one or more essential components are not satisfactorily described.
- 5- Must be revised and resubmitted because one or more required elements are missing or previous requests for revision were ignored.
