Proposed New BS: Digital Media and Design

This is a recommendation that the University Senate approve, for submission to the Board of Trustees, the establishment of a new BS degree: Digital Media and Design, in the School of Art and Visual Studies within the College of Fine Arts.

The revised proposal is attached.

Best-

Margaret

Margaret J. Mohr-Schroeder, PhD | Associate Professor of STEM Education | <u>COE Faculty</u> <u>Council Chair</u> | <u>SAPC University Senate Committee Chair</u> | <u>University Senator</u> | Secondary Mathematics Program Co-Chair | <u>STEM PLUS Program Co-Chair</u> | <u>Department of STEM</u> <u>Education</u> | <u>University of Kentucky</u> | <u>www.margaretmohrschroeder.com</u>

This form has two sections. Section A contains information required by the University Senate and Registrar's office and Section B contains information required by two external entities, the CPE (Council on Postsecondary Education) and SACS-COC (Southern Association of Colleges and Schools Commission on Colleges). Although only Section A is required for University Senate approval, every question must be answered to receive CPE approval. Please write "not applicable" wherever that is the appropriate response, leaving no area blank.

The CPE requires that a pre-proposal and full proposal be submitted. The pre-proposal is submitted after a proposed program has received college-level approval. Answers to questions identified with a * by the question number on this form should be used for the CPE's pre-proposal. Such questions are in both Section A and Section B. Please email <u>institutionaleffectiveness@uky.edu</u> for more information about the CPE's <u>pre-proposal process</u>. The CPE's full proposal requires completion of both Sections A and B of this form and is submitted after approval by UK's Board of Trustees.

Once approved at the college level, your college will send the proposal to the appropriate Senate academic council (HCCC and/or UC) for review and approval. Once approved at the academic council level, the academic council will send your proposal to the Senate Council office for additional review via a committee and then to the Senate for approval. Once approval. Once approved by the Senate, the Senate Council office will send the proposal to the appropriate entities for it to be placed on an agenda for the Board of Trustees. The contact person listed on the form will be informed when the proposal has been sent to committee and other times as appropriate.

SECTION	A – INFORMATION REQUIRED BY UNIVERSITY SENATE		
1. Basic Ir	formation: Program Background and Overview		
1a	Date of contact with Institutional Effectiveness (IE) ¹ : 2-10-2015		
	Appended to the end of this form is a PDF of the reply from Institutional Effectiven	ess.	
1b	Home College: Fine Arts		
1c	Home Educational Unit (school, department, college ²): School of Art and Visual Studies	5	
1d*	Degree Type (BA, BS, etc.): B.S.		
1e*	Program Name (Music, Human Health Sciences, etc.): Digital Media and Design		
1f*	CIP Code (provided by Institutional Effectiveness): 50.0102-Digital Arts		
			1
1g	Is there an accrediting agency related to this program?	Yes 🔀	No
	If "Yes," name: National Schools of Art and Design		
1h*	Requested effective date: Image: Split Semester following approval. OR Image: Split Semester following approval.	ecific Date	³ :Fall 20

¹ You can reach Institutional Effectiveness by phone or email (257-2873, <u>institutionaleffectiveness@uky.edu</u>).

² Only interdisciplinary undergraduate degrees may be homed at the college level.

³ Programs are typically made effective for the semester following approval. No program will be made effective unless all approvals, up through and including Board of Trustees and CPE approval, are received.

1i*	Anticipated date for granting first degree(s): December 2017

	C. Understanding of the characteristics and cape					
	their appropriateness for particular expressive, f larger contexts and systems; and their influences		ineir positions within			
		on marrianais and society.				
	NEW UNDERGRADUATE DEGREE PROGRAM		Page 2 of 35			

	D. Knowledge of the processes for the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.)					
	<i>E.</i> Ability to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically-mediated communication, objects, and environments.					
	<i>F. Knowledge of history, theory, and criticism with respect to such areas as film, video, technology, and digital art and design.</i>					
	G. Ability to work in teams and to organize collaborations among people from different disciplines. H. Ability to use the above competencies in the creation and development of professional quality digital media productions.					
	The ability to communicate effectively in visual, oral, and written form (GCCR) will be addressed throughout the curriculum but also in the specific course Art 301.					
	Describe the rationale and motivation for the program. Give reference to national context, including					
2e	equivalents in benchmark institutions. (150 word limit)					
	Many students in our digital classes have complained that they cannot get the degree they want at UK. UK lags behind many colleges and universities in the Southeast by the absence of degree programs in graphic design or digital media or a combination of the two. The DMD B.S. degree will bring U.K up to the degree offering standards available to most students enrolled in similar studio art programs in other Southern Regional Education Board (SREB) states. But its integrative approach to digital media most closely resembles only those degree programs offered by comparableflagship, research I universities, such as the University of Florida, the University of George, and the University of Texas. And even these institutions do not possess a degree program that weaves so closely together graphic design, video, web design, photography, 3-d fabrication and print media.					
2f	Describe the proposed program's uniqueness within UK. (250 word limit)					
	We have crafted a degree for a creative class of students who want the digital skills to be successful in today's job market. The College of Communication's Media Arts degree program emphasizes mass media. The College of Design offers pre-professional training in architecture and interior design. The College of Engineering's programs are too technical for the type of student we would mostly attract. And the Art Studio B.A. and B.F.A. degree programs focus on fostering fine as opposed to applied artists/creatives.					
2g	Describe the target audience (150 word limit)					
	Describe the target audience. (150 word limit)					
	Describe the target audience. (150 word limit)The B.S. degree is for students seeking training in software applications, lens-based technologies, and digital design within a studio environment that emphasizes creativity. The business world and industry need graduates able to apply such digital software/hardware to create innovative solutions to common problems. These individuals are valued for their creativity, for their knowledge of contemporary and past visual culture, and for the digital skills they are able to bring to any task.

2i	Does the program <u>require</u> a minor?	Yes ⁴ No				
21						
	If "Yes," what is the name of the minor? n/a					
2j*	Are necessary resources available for the proposed new program?	Yes 🔀 🛛 No 🗌				
2)	(A more detailed answer is requested in Section A, part 4.)					
	A more detailed unswer is requested in Section A, part 4.)					
2k	Describe how the proposed program will be administered, including admissions, student advising, retention, etc. (150 word limit)					
	The DMD will be administered by the School of Art & Visual Studies administrative lea alongside SA/VS other four undergraduate degree programs. The new degree shares Sc					
	regarding everything from admissions to advising to retention initiatives and so on. Ho					
	will be monitored by a faculty digital media and design assessment committee, consisting record in the School of Art and Visual Studies.					
21	Are multiple units/programs collaborating to offer this program?	Yes 🗌 No 🔀				
	If "Yes," please discuss the resource contribution(s) from each participating unit/progr	am. (150 word limit)				
	(Letters of support will be addressed in subsequent sections.)					
	n/a					
2m	Has this or a similar program been previously offered at UK but was closed by the CPE?	Yes 🗌 No 🖂				
	If "Yes," describe. (<i>300 word limit</i>)					
	n/a					
2n	Are there any current UK programs which the proposed program could be perceived as replicating?	Yes 🔀 🛛 No 🗌				
	If "Yes," give a rationale for why this is not duplication, or is a necessary duplication. (2					
	The only degree program similar to the DMD outside of our own degree programs in s of Communications Media Arts B.A. degree. However, we believe that the Media Arts concerned with mass media and communications and is primarily taught in lecture cou is a studio-based program with an emphasis on individual creative design applications Media Arts majors enrolling in our digital media courses to master the technical known is not set up to provide. Moreover, we are hoping to see double majors between the tw students minoring in the respective degree programs, since they complement each other For a more comprehensive response, please review document: Attachment # 1: Addena degree)	degree is primarily urse format. The DMD s. In fact we often get ledge that Media Arts to programs as well as er so well				
	If "Yes," two pieces of supporting documentation are required.

	<i>n/a</i> Total Number of Advisory Board Members									

⁵ An advisory board includes both faculty and non-faculty who are expected to advise the faculty of record on matters related to the program, e.g. national trends and industry expectations of graduates.

⁶ For questions about alternative delivery modes, please contact UK's Distance Learning Programs and e-Learning office (URL above).

⁷ Per the Southern Association of Colleges and Schools Commission on Colleges (SACS) definition of distance education, distance education is a formal educational process in which the majority of the instruction (interaction between students and instructors and among students) in a course occurs when students and instructors are not in the same place. Instruction may be synchronous or asynchronous.

3b*	If any percentage of the program will be offered via the alternative learning formats below, check all that
30	apply, below.
	Distance learning.
	Courses that combine various modes of interaction, such as face-to-face, videoconferencing, audio-
	Conferencing, mail, telephone, fax, email, interactive television, or World Wide Web.
	Technology-enhanced instruction.
	Evening/weekend/early morning classes.
	Accelerated courses.
	Instruction at nontraditional locations, such as employer worksite.
	Courses with multiple entry, exit, and reentry points.
	Modularized courses.
	Give pedagogical rationale for the use of alternative delivery modes in the proposed program. Consider the
	aspects below and elaborate as appropriate. (200 word limit)
3c	Synchronous and asynchronous components.
	Balance between traditional and non-traditional aspects.
	Hybrid elements.
	The DMD will be looking to make employer internships an integral part of the student's program.
4. UK Reso	urces
4a*	Will the program's home educational unit require new or additional faculty? Yes No 🖂
40	If "Yes," provide a plan to ensure that appropriate faculty resources are available, either within UK or
	externally, to support the program. Note whether the new and additional faculty will be part-time or full-
	time faculty. If "No," explain why. (150 word limit)
	n/a
	If "Yes," when will the faculty be appointed? (150 word limit)
	n/a
	Will the program's home educational unit require additional non-faculty resources,
4b*	e.g. classroom space, lab space, or equipment?
	If "Yes," provide a brief summary of additional non-faculty resources that will be needed to implement this
	program over the next five (5) years. If "No," explain why. (150 word limit)
	n/a
4c	Will the program include courses from another educational unit(s)? Yes No X
	If "Yes," list the courses and identify the other educational units and subunits that have approved the
	inclusion of their courses. (150 word limit)
	n/a
	If "Yes," two pieces of supporting documentation are required.
	Check to confirm that appended to the end of this form is a letter of support from the chair/director ⁸ of
	the other unit(s) from which individual courses will be used. The letter must include demonstration of true
	collaboration between multiple units ⁹ and impact on the course's use on the home educational unit.
	Check to confirm that appended to the end of this form is verification that the chair/director of the other
	unit(s) has consent from the faculty members of the unit. This typically takes the form of meeting minutes.

⁸ A dean may submit a letter only when there is no educational unit below the college level, i.e. there is no department/school.

⁹ Show evidence of detailed collaborative consultation with such units early in the process. **NEW** UNDERGRADUATE DEGREE PROGRAM

¹¹ Course mapping (or "curricular mapping") is a representation of how faculty intend to approach and assess each of the student learning outcomes identified for the courses for the degree program, with an emphasis on courses required for all degree candidates. It is a master chart that indicates which objectives are being met, to what extent, and how often. This identifies whether an objective is "introduced," "developed," and/or "mastered" within a given course; it may be helpful also to chart any classroom-based assessment measures used to demonstrate that claim.

¹² An assessment plan is typically a tabular grid that illustrates the artifacts, rubrics, assessment team, and periods of assessment for the SLOs.

SECTION	B – INFORMATION REQUIRED BY CPE AND SACS
10. Progr	am Overview – Program Quality and Student Success
10a	 Highlight any distinctive qualities of the proposed program. Are any faculty nationally or internationally recognized for expertise in this field? Does this program build on the expertise of an existing locally, nationally, or internationally recognized program at UK? (300 word limit) The DMD B.S. degree will bring U.K up to the degree offering standards available to most students enrolled in similar studio art programs in other Southern Regional Education Board (SREB) states. But its integrative approach to digital media most closely resembles only those degree programs offered by comparable flagship, research I universities, such as the University of Florida, the University of George, and the University of Texas. And even these institutions do not possess a degree program that weaves so closely together graphic design, video, web design, photography, 3-D fabrication and print media. And we took the unique step of shaping the degree as a bachelor of science degree, emphasizing not only the applied nature of the program but also the number of studios required by students, more than a B.A. in studio art and only slightly less than a B.F.A. We currently have 13 faculty whose creative research occurs in and through digital-based platforms. Our faculty includes many artists with national and international reputations and exhibition records. We anticipate the School of Art and Visual Studies Building will further connect the pedagogical and research interests of the digital faculty, since for the first time in SA/VS' history they will be working and teaching in close proximity to each other. We expect our new studios to foster unprecedented levels of collaboration
10b*	 among faculty and between faculty and students (similar to 2b) What are the intended student learning outcomes (SLOs) of the proposed program? Address one or more of the five areas of learning – broad, integrative knowledge; specialized knowledge; intellectual skills; applied learning; and civic learning. (300 word limit) The School of Art and Visual Studies is accredited by the National Association of Schools of Art and Design
	 (NASAD). In proposing the B.S. degree in Digital Media and Design we are following the national standards set by NASAD: 1. Knowledge of the concepts related to the visual, spatial, sound, motion, interactive, and temporal elements/features of digital technology and principles for their use in the creation and application of digital
	 media-based work. 2. Understanding of narrative and other information/language structures for organizing content in time- based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems. 3. Understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society.
	 4. Knowledge of the processes for the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.) 5. Ability to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically-mediated communication, objects, and environments. 6. Knowledge of history, theory, and criticism with respect to such areas as film, video, technology, and
	digital art and design. 7. Ability to work in teams and to organize collaborations among people from different disciplines. 8. Ability to use the above competencies in the creation and development of professional quality digital media productions.
10c	Clearly state the student admission, retention, and completion standards designed to encourage high quality. (300 words)
	As the state's flagship and land grant university we have an obligation, as far as possible, to admit any student who is academically qualified to attend U.K. into our major. Initially, we should be able to admit any

	overall. We will be measuring the quality and value of the new degree by 1) the number of majors enrolled (we expect 100 majors by the end of the second year) and by the graduation percentage rate (we set the low- end at 80%). We will be constantly monitoring retention rates from 1st to 2nd fall and from 2nd to 3rd fall, to make sure that students are progressing through the degree (we set minimum retention rate at 85% for 1st to 2nd fall and 80% for 2nd to 3rd fall—we hope to do significantly better). While we believe that the new B.S. degree in Digital Media and Design will be very popular with current and prospective students, we will not allow the program to grow beyond the ability of our current faculty and facilities to manage. If we
	cannot find additional recurring dollars to support expansion of the degree once we have reached capacity, we will begin to limit enrollment through higher admission requirements, etc. While it is our goal to let any prospective student major in the new degree, we will take a realistic approach to expansion and be careful not to outgrow our resources.
10d	Describe how the proposed program will articulate with related programs in the state. Include the extent to which student transfer has been explored and coordinated with other institutions. Note: Convert all draft articulation agreements related to this proposed program to PDF and append to the end of this form. (300 word limit)
	Currently, there are no exact equivalents to the B.S. degree in digital media and design in the Commonwealth. However, in Kentucky, Murray State offers a full range of graphic design courses as an area of concentration within their studio program, but no separate degree. NKU offers a Visual Communication Design degree, which formerly was a graphic design degree. EKU offers a BFA in Graphic Design. WKU offers a graphic design track within their BA and BFA degrees. Finally the University of Louisville has a BFA in Communication and Design. Our degree is more expansive than any of these in that it includes digital fabrication, video, animation, sound, and photography within the major. Nonetheless any student who begins a degree in studio at any community college or four-year institution should be able to transfer into the U.K. SA/VS B.S. degree program with only a minimum of extra coursework at the studio foundation level. Thus no degree agreements have been deemed necessary.
10e	Identify the applicant pool and how applicants will be reached. (300 word limit) Currently, the University has nearly 113 students who have declared for the minor in Digital Media and Design and another 24 minoring in photography. It is expected that a large majority of these students will declare a Digital Media and Design major once they are able to do so. Extensive outreach will be employed to inform other students of the Digital Media and Design major using mailings, social media, and our extensive network of high school art teachers throughout the state. We will be sending out posters to Kentucky high school art faculty and to art faculty in the Commonwealth. We will also announce the new degree to the studio art program faculty in the state's colleges and universities.
11 Mission	n: Centrality to the Institution's Mission and Consistency with State's Goals
	<i>(similar to question 2b)</i> List the objectives of the proposed program? These objectives should deal with the
11a*	specific institutional and societal needs that the program will address. (300 word limit)
	The DMD's primary goal is to improve the quality and variety of educational experiences for our undergraduates. Our objective is to: 1.) To prepare students for successful careers in digital media and design; 2.) To foster creativity and collaborative undergraduate research; 3.) To develop graduates who are able to apply theoretical understanding to real-world issues in connecting people, organizations, and communities through digital technologies; 4.) To prepare students for leadership roles in a global technological society.
11b*	Explain how the program objectives above in item 11a support at least two aspects of <u>UK's institutional</u> mission and academic strategic plan? (150 word limit)

	We are committed to our mission, which primarily "is to link the study of art and visual culture to the broad aims of the University's undergraduate, liberal arts tradition by providing world-class instruction in the history, theory, and practice of art." To this basic mission we add opportunities for advanced study through undergraduate professional programs such as the DMD B.S. degree. By pulling together the physical and human resources now available to SA/VS and by integrating practices across multiple disciplines, students will be encouraged to apply their hard-won skills in a variety of digital-based technologies to career pathways consistent with the new economies of the digital age.
	How do the program objectives above in item 11a support at least two aspects of the Council on
11c*	 How do the program objectives above in item 11a support at least two aspects of the Council on Postsecondary Education's (CPE) Strategic Agenda and the statewide implementation plan? (300 word limit) The new B.S. degree in Digital Media and Design conforms to at least three major areas of Kentucky's strategic agenda for postsecondary education as well as the forthcoming strategic plan for the University of Kentucky. 1). We believe the program will positively impact student success by creating more motivated students who see clear career paths available upon degree completion. Similarly we believe the program will lead to higher graduation rates, for the same reason. 2). And because of the very nature of the B.S. degree's academic requirements, it will also inherently foster creative, and innovative, uses of technology. This lies at the core of the new degree's mission. In addition, within the School itself the new degree takes advantage of faculty hires that have already been made and thereby makes more effective and directed use of their talents. 3). Finally, Kentucky needs the kind of highly educated workforce within the field of the digital arts that this degree program will produce. Our graduates, first as interns and then in their post-graduate jobs will work closely with industrial designers, with engineers, and with business leaders. Their collaborative and creative talents will have a strongly positive impact on the quality of life and the economic vitality of the Kentucky
11d*	<i>communities in which they live.</i> If an approval letter from an Education Professional Standards Board (EPSB) is required, check the box below and append a PDF version of the letter to this form. (E.g. any program leading to teacher, principal, or superintendent certification, rank change, etc.)
	(E.g. any program leading to teacher, principal, or superintendent certification, rank change, etc.)
12. Reso	urces
12a*	How will the program support or be supported by other programs within the institution? For example, shared faculty, shared courses, collaborative research, etc. (300 word limit)
	The new B.S. degree is an extension of, rather than a substitution for, current curricula and practices in SA/VS. As such, the program will offer undergraduates a greater variety of degree options without requiring significant reshuffling of academic assignments or course offerings. The School will simply be able to give greater coherence to the courses useful to students seeking digital-based skills.
12b	What will be the projected "faculty-to-student in major" ratio? (150 word limit)
	1/15
12c	Describe the library resources available ²¹ to support this program. Access to the qualitative and quantitative library resources must be appropriate for the proposed program and should meet recognized standards for study at a particular level or in a particular field where such standards are available. Adequacy of electronic access, library facilities, and human resources to service the proposed program in terms of students and faculty will be considered. (300 word limit)
	Library resources for the new degree are the same that supports our other degree programs in SA/VS. The Art collections in the Lucille Caudill Little Fine Arts Library comprise over 60,000 volumes of monographs. There are approximately 140 serials subscriptions and another eight subscriptions for online databases that
	specifically serve art studio and art history, such as ArtStor, Art Index, Artbibliographies Modern and Bibliography of the History of Art.
12d	specifically serve art studio and art history, such as ArtStor, Art Index, Artbibliographies Modern and

²¹ Please contact Institutional Effectiveness (<u>institutionaleffectiveness@uky.edu</u>) for more information. **NEW** <u>UNDERGRADUATE DEGREE PROGRAM</u>

	facilities and instructional equipment must be adequate to support a high-quality program. Address the
	availability of classroom, laboratory, and office space, as well as any equipment needs. (300 word limit)
	SA/VS has moved into a new facility (Fall 2015). Whereas before the building opened SA/VS operated three
	computer labs in various locations on the UK campus, in the new building we have five such labs and will be
	developing a computer inventory to outfit a sixth (for which we already have space). In addition, we have a
	photography suite which includes the capacity to make large scale digital prints; we have a "FabLab", a
	three-dimensional fabrication studio with computer-based laser cutters, 3-d printers, C-and-C router,
	vacuum former, and various light machinery; and we have a print shop set up to design and fabricate digital
	prints. All digital faculty have appropriate office or studio space. Finally, we operate a media center where
	students can check out film and digital cameras, lighting equipment, drawing pads, and similar digital
	technology.
13 Dema	and and Unnecessary Duplication
13. Demo	Provide justification and evidence to support the need and demand for this proposed program. Include any
	data on student demand, employer demand, career opportunities at any level, or any recent trends in the
	discipline that necessitate a new program. (300 word limit)
13a*	• This evidence is typically in the form of surveys of potential students, enrollments in related
	programs at the institution, employer surveys, and current labor market analyses.
	Anecdotal evidence is insufficient. Demonstrate a systematic collection of data, thorough study of
	the data, and a reasonably estimated student demand for the program.
	 Provide evidence of student demand at state and national levels.
	We surveyed the 73 public colleges and universities that are accredited both by SACS and by our national
	accreditation body, NASAD. We determined that of these schools SA/VS has the 9th largest faculty on staff.
	46 of the 73 studio art programs offer B.A. or B.F.A. degrees in some form of graphic design, visual
	communication and/or digital media, as well as fine arts degrees. However, only the largest schools,
	typically the respective states' land grant and research institutions, offer programs comparable to what
	SA/VS is proposing. The sheer number of programs offering separate graphic design degrees is a clear
	reflection of student demand. In our experience prospective students and their parents typically ask first
	about the availability of graphic design courses and degree before inquiring about any other aspect of what
	SA/VS might offer students. SA/VS faculty have been strongly opposed to the idea of offering just another
	graphic design degree. There are enough of these already. We surveyed students currently enrolled in our
	digital-based courses (A-S 200, Introduction to Digital Art, Space and Time, A-S 280, Introduction to
	Photographic Literacy, A-S 300, Digital Photography, and A-S 340, Graphic Design to see what students
	were looking for that UK was currently not offering. 347 students responded, with 229 expressing interest in
	a major in digital media and design and 338 percent agreeing with the statement that the skills provided by
	digital-based courses are important to today's job market. Keep in mind that only 31 students who
	participated in the poll were majors or double majors in SA/VS, which is to say that 91% of the respondents
	were only enrolled in these courses to fulfill their UK Core Creativity requirement. Student interest in such a
	degree at UK parallels enrollments at other colleges and universities that offer either a graphic design B.A.
	or B.F.A. or a digital arts degree. We contacted administrators of units across the Southern Athletic
	conference and they all report that the greater proportion of their majors are in these majors compa
4.21	
13b	Clearly state the degree completion requirements for the proposed program. (150 word limit)
	The B.S. degree shares a number of basic requirements with the B.A. and B.F.A. in studio art. Among them,
	with some differences in emphasis are 19 hours of Foundations, including six guided electives in art history.
	There are 27 hours of required studio courses at the 300 level or above plus nine hours in what we call our
	"Career Pathway Core", which consists of a projects capstone course, a professional practices course which
	also serves as the degree's graduation communication and composition requirement, mandated by the UK
	Faculty Senate, and a credit bearing course for professional internships. Students also have at least six
	credit hours of guided electives in art history and visual culture at the 300-level and above.
	Total number of hours required for degree 121 Number of hours in degree program core 49 Number of
	hours in guided electives 30 Number of hours in free electives 18

	alternative existing credentials and employers' willingness to pay higher salaries to graduates of the proposed program. (300 word limit)
	Graduates of the proposed B.S. degree in Digital Media and Design will be qualified for multiple related fields, as art directors, graphic designers, multimedia artists and animators, web developers, photographers, film and video editors, and commercial and industrial designers. Beginning with art directors, the U.S. Department of Labor, using 2012 statistics, cited 74,800 jobs nationally with a median salary of \$80,080, and with an expected growth of 3%. In Kentucky the forecast is for a 10% growth in this area by 2022. Qualifications for art directors include training as graphic designers, illustrators, copy editors, and photographers (all of which will be addressed in the new degree). In the field of graphic design nationally in 2012 there were 259,500 jobs with a median salary of \$44,150. The U.S. government projects a 7% growth in the field, but in Kentucky, a 14% growth has been projected. There were 68,000 jobs for multimedia artists and animators in 2012 with a median salary of \$61,370. The Department of Labor expects a 6% growth in this field; in Kentucky a 13% growth has been projected. The Department of Labor expects a 20% growth in demand for web developers. In 2012 there were 141,400 jobs nationally with a median salary of \$62,500. For students seeking jobs as photographers there were 136,300 jobs nationally in 2012 with a median salary of \$28,490, and with an expected growth rate of 4%. A 11% growth in positions for film and video editors has been projected and a 16% growth in jobs for commercial and industrial designers by 2022. Some of our graduates will even acquire the skills necessary to be software developers, a booming business in which there were 1,018,000 jobs nationally in 2012 with a median salary of \$93,350. Both in Kentucky and nationally a growth of about 21% is expected in this field. In short, all these fields can expect at least moderate growth in available positions. Most job fields offer better than the state average in median salaries. These fields are vital components of the c
	of the state's economy.
13n*	Describe the types of jobs available for graduates, average wages for these jobs, and the number of anticipated openings for each type of jobs at the regional, state, and national levels. <i>See answer 13m.</i>

Number	Course Description (from the Bulletin or the most recent new/cha	nge course f	orm)		
	Creativity Practices in Art Studio. This seminar course for incoming Art Studio	and Art Edu	cation majors is		
	designed to develop creative strategies and orient students to the Department a		-		
A C 101	discussion, in-class exercises, and out-of-class assignments, students will gain		-		
A-S 101	resources and programming at UK and in the local community. Students will a	cquire skills	for a sustained		
	career in the visual arts, including an introduction to professional practices and	d portfolio d	evelopment. Art		
	Studio and Art Education Majors only; no prerequisites				

²³ For questions about cost and funding of the program, please contact your department chair, business officer, or associate dean for academic affairs.

A-S 001	Foundation Exhibition. An annual exhibition where all first-year Foundation students will select and exhibit one of their works created in a course at UK during their first year. Students will be required to select their own work, present it professionally, and provide an accompanying artist's statement. The exhibition will occur each spring semester. Grade: P or F. Prereq or concur: A-S 101, A-S 102 and A-S 130.
A-S 102	Two-Dimensional Surface. A broad, cross-disciplinary studio course exploring design elements and principles as the basic means of organizing two-dimensional space. Each student develops the ability to form strategies, concepts and ideas to enhance creativity and articulate personal expression.
A-S 130	Three-Dimensional Form. A broad, cross-disciplinary studio course exploring the visual language of drawing through observation. Students learn the mechanisms of visual perception, how individual components of a drawing relate to the organization of the composition as a whole. Each student develops not only observational skills rooted in traditional drawing media for realistic renderings, but also gradually builds strategies, concepts, and ideas for abstract expression
A-S 200	Introduction to Digital Art, Space and Time. This course provides fundamental instruction in digital media as a creative tool. Students will learn the basics of digital collage, video editing and sound design. An overview of historical and contemporary digital art practice will be presented as well as elements of designs and composition. Four studio hours and one 50-minute lecture per week.
A-S 285	Lens Arts. A-S 285 is an introductory course in digital image making that focuses on the still and moving image as an art practice. Students will learn the fundamentals of camera operation and still and moving image editing software in order to build an individualized portfolio. Students will be introduced to contemporary lens arts practice through research and assignments.
А-Н 101	Introduction to Visual Studies (recommendedadditional visual studies or art history courses from approved list). The course introduces students to the concepts and techniques of visual literacy. It explores a full spectrum of man-made visual forms encountered by contemporary Americans from architecture and works of art to graphic novels, advertisements, television programs and films, photos and the Internet.
16b	Program Guided Electives Courses (for the major)
16b Prefix & Number	Course Description (from the Bulletin or the most recent new/change course form)
Prefix &	Course Description (from the Bulletin or the most recent new/change course form) Required Outside Concentration: In addition to the major requirements, each student with the approval of his or her academic advisor will select a minimum of 18 credits in related course work in an outside area of concentration, of which 12 hours must be from a single discipline or focused area, such as film studies, WRD, Media Arts, Business, etc. and at the 300 level or above. Note: It is recommended that students pursuing a B.S. degree in Digital Media and Design enroll in at least one 3-credit internship under one of the following course numbers: A-H 399, A-S 399, EXP 396, and EXP 397. These extra Career Pathway Core courses may be substituted for an equal number of credits to be taken in the area of outside concentration.

VIII. Statistical Inferential Reasoning Choose one course from approved list	Note: a 3 credit internship, A-S 399, is recommended, but not required; This extra Career Pathway Core class would reduce the number of credits to be taken as a free elective.
IX. Community, Culture and Citizenship in the USA A-H 360 Visual Culture of Politics - recommended	3. History and Theory:
or Choose one course from approved list	At least 9 hours of art history, visual studies, film history or theory at or above the 300 level from approved list.
X. Global Dynamics Choose one course from approved list	
	Subtotal: Major

UK Core	hours:
hours	
	Students are required to complete a minimum of two semesters at the University of Kentucky following admission into the B.S. program.
	Required Related Outside Concentration
	To support the collaborative and interdisciplinary needs of digital media major's educational and employment goals, we have added a <i>related outside concentration</i> to the degree instead of a minor. Courses in several departments might be selected such as Asian studies, Business Administration, Gender and Women's Studies, Media Arts or WRD to create a well rounded and competitively and individually focused concentration. Each student in consultation with his or her academic advisor will select a minimum of 21 credit hours in one theme and from at least two departments in course work as an outside concentration, of which 12 hours must be above the 300 level, and 12 hours must come from a single discipline.
	Subtotal: Required Outside Concentration21
	Electives Students my take up to 6 hours of free electives. Subtotal: Electives
	TOTAL HOURS:

BS, Digital Media and Design (50.0102)

Thursday, March 31, 2016

MEMORANDUM

TO: University Senate

FROM: Dr. Rob Jensen, Director, School of Art and Visual Studies

I am pleased to put forward to the Faculty Senate for consideration our new degree proposal, a Bachelor of Science degree in Digital Media and Design. This degree has been three years in the making and is the product of many faculty hands, innumerable meetings and discussions among the School, the College, with other academic units and colleges. We are proud of what we have produced and believe it will positively contribute to the educational and research environment of the University of Kentucky.

When the proposal was passed by the Undergraduate Council on March 29, the Council suggested that we take a few steps to ensure the consent of the Senate.

It was pointed out that the degree's capstone course sounded in the description like an independent study course. We will put a minor course change through the system to clarify this: Current language:

A-S 547 ADVANCED DIGITAL PROJECTS. (3) An advanced course that allows digital media students to propose and create large-scale, in-depth projects such as short films, video installations, a complete animation, web-based research projects, etc. that require time and focus to produce. Independently driven projects will be developed in the classroom setting. 3 credit hours, may be repeated up to 9 hours. Prereq: Consent of instructor. Proposed language:

A-S 547 DIGITAL MEDIA PROJECTS CAPSTONE. (3) A culminating course that allows digital media students to propose and create large-scale, in-depth projects such as short films, video installations, a complete animation, a photographic series, a 3D printing installation, a web-based research project, etc. that require time and focus to produce. 3 credit hours. Prereq: Senior Standing, B.S. Digital Media and Design Majors We were asked to provide new wording for the *University Bulletin* that would describe in the College of Fine Arts' front material the new B.S. degree in Digital Media and Design. We will be forwarding the new language for the degree in the College of Fine Arts section of the *Bulletin* to the Registrar on Friday, April 1 along with the proposed description of the new degree program for inclusion in the *Bulletin* should the degree receive Senate and Board of Trustees approvals.

In the *Bulletin* we address what is also a concern of the Undergraduate Council, the nature of the Bachelor of Science degree. The precise wording in the *Bulletin* will be: "The B.S. degree program in Digital Media and Design offers students an intensive digital media curriculum at a pre-professional level. This degree is available to students who plan to undertake careers in practical and commercial applications of digital design and related technologies involved in the creation and use of digital imagery." The rationale for this language and for the choice of the B.S. degree are as follows:

- 1) We chose the Bachelor of Science designation first because we wanted to make sure that the degree was perceived by students (and faculty) as an applied arts rather than a fine arts or a liberal arts degree. Second the degree acknowledges the fact that graduates will have engaged significantly in digital technologies (programming, advanced software modeling, and the like) that studio art students generally are not expected to master Third, we expect graduates to find employment in applied design fields, as graphic designers, photographers, web designers, product designers, and so on, rather than as visual artists producing works of art for the home, the gallery, and the museum.
- 2) The B.S. degree designation is also in accordance to the standards of our accreditation body, National Schools of Art and Design (NASAD), which permits the use of Bachelor of Science degrees exclusively to describe professional degree programs in design. Accordingly, NASAD requires that at least 65% of the course credit for such degrees be in the creation and study of art and design.
- 3) The relatively high percentage of design-related coursework expected by NASAD for the B.S. degree means that students completing the major will have had to take more studios (and more studios in explicitly digital design areas) than would B.A. students in studio art, if not quite as many studio courses as students pursuing a Bachelor of Fine Arts degree with the intent to enter an art-related field (although we expect many graduates will have taken as many art studios as their BFA contemporaries).
- 4) We are simultaneously seeking accreditation approval for the new B.S. degree program from NASAD; we are confident that the new degree will meet our national accreditation standards.

Respectfully submitted by Dr. Rob Jensen

MA

ATTACHMENT #2

CFA Curriculum Meeting:

Nov 13, 2015

Members Present: Toni Hardin - chair Thearter Scott Lee Atchison Music **Advising Deans Office** Debra Garrett Russell Henderson Thearter Julie Hobbs Music Art Administration Yuha Jung Andrew Maske Art History David Sogin Music Lee Paynter Visual Art

The CFA Curriculum committee took up the Digital Media and Design degree submitted from the School of Art and Visual studies. After some discussion the proposal for the new degree program was passed unanimously.

Respectfully submitted,

David W. Sogin, Ph.D. Associate Dean

Full Proposal - Basic Info	
Institution :	University of Kentucky
Program Type :	Single Institution
Program Name :	Digital Media and Design
Degree Level :	Baccalaureate
Degree Designation :	BACHELOR OF SCIENCE
CIP Code (2-Digit) :	50-VISUAL AND PERFORMING ARTS.
CIP Code :	50.0102-Digital Arts.
Academic Unit (e.g. Department, D	ivision, School): School
Name of Academic Unit:	School of Art and Visual Studies
Name of Program Director:	Dr. Robert Jensen
Intended Date of Implementation:	8/26/2016
Anticipated Date for Granting First	Degrees : 12/5/2017
Date of Governing Board Approval	: 6/5/2015

Full Proposal - Mission: Centrality to the Institution's Mission and Consistency with State's Goals

1. List the objectives of the proposed program. These objectives should deal with the specific institutional and societal needs that this program will address.

- 1. Meeting student demand while growing our majors
- 2. Attracting and developing a higher quality cadre of students in our programs
- 3. Attracting students regionally as well as within the Commonwealth
- 4. Fully utilizing the skills our faculty has to offer
- 5. Developing a program designed for inter-college collaboration
- 6. Furthering undergraduate and graduate research within designed collaborative environments
- 7. Offering students the best possible training in the latest digital technologies and related applications
- 8. Fostering the creativity of students in design-related fields

2. Explain how the proposed program relates to the institutional mission and academic strategic plan.

The Digital Media and Design B.S. Degree's Alignment with UK's Institutional Mission and Strategic Plan: The DMD's primary goal is to improve the quality and variety of educational experiences for our undergraduates. We are committed to our mission, which primarily "is to link the study of art and visual culture to the broad aims of the University's undergraduate, liberal arts tradition by providing world-class instruction in the history, theory, and practice of art." To this basic mission we add opportunities for advanced study through undergraduate professional programs such as the DMD B.S. degree. By pulling together the physical and human resources now available to SA/VS and by integrating practices across multiple disciplines, students will be encouraged to apply their hard-won skills in a variety of digital-based technologies to career pathways consistent with the new economies of the digital age.

Anyone can master the software. Rhino, InDesign, Illustrator, Final Cut Pro, and similar applications are tools, but the business world and industry need graduates able to apply such software to create innovative solutions to common problems. These individuals are valued for their creativity, for their knowledge of contemporary and past visual culture, and for the skills they are able to bring to any task. SA/VS is late to the game vis-à-vis graphic design and media arts programs. Yet we see this as an advantage; our program leaps beyond the siloed degrees such as graphic design in favor of a significantly more integrated degree program incorporating computer-based and lens-based creation, expressed through both two- and three-dimensional digital technologies.

Alignment with Statewide Implementation plan:

Adequately funded - short-term, SA/VS rolls out the B.S. degree in Digital Media and Design without any additional revenue, capitalizing on resources that have recently been made available. Farther out, growth and UK and State budgets will determine whether we seek to add faculty and/or staff lines or simply make admissions more restrictive.

Accountable - SA/VS has been a campus leader in implementing government-mandated assessment procedures. SA/VS has also had a long history of being fiscally responsible. The College of Fine Arts has a new Integrated Business Unit (IBU), which has led to ever greater transparency in budgeting and administrative accountability.

3. Explain how the proposed program addresses the state's postsecondary education strategic agenda.

The new B.S. degree in Digital Media and Design conforms to at least three major areas of Kentucky's strategic agenda for postsecondary education as well as the forthcoming strategic plan for the University of Kentucky. 1). We believe the program will positively impact student success by creating more motivated students who see clear career paths available upon degree completion. Similarly we believe the program will lead to higher graduation rates, for the same reason. 2). And because of the very nature of the B.S. degree's academic requirements, it will also inherently foster creative, and innovative, uses of technology. This lies at the core of the new degree's mission. In addition, within the School itself the new degree takes advantage of faculty hires that have already been made and thereby makes more effective and directed use of their talents. 3). Finally, Kentucky needs the kind of highly educated workforce within the field of the digital arts that this degree program will produce. Our graduates, first as interns and then in their post-graduate jobs will work closely with industrial designers, with engineers, and with business leaders. Their collaborative and creative talents will have a strongly positive impact on the quality of life and the economic vitality of the Kentucky communities in which they live.

4. Explain how the proposed program furthers the statewide implementation plan.

A. Adequately funded

The B.S. degree in Digital Media and Design has the advantage of becoming operational without requiring any additional recurring dollars.

B. Accountability

The new degree will participate in the on-going assessment process required by both SA/VS's assessment body, the National Association of Schools of Art and Design (NASAD) and by the university's assessment body SACSCOC. We intend to ensure that our students attain the student learning outcomes set out in the degree's requirements.

C. Performance Metrics and Targets

We will be measuring the quality and value of the new degree by 1) the number of majors enrolled (we expect 100 majors by the end of the second year) and by the graduation percentage rate (we set the low-end at 80%). We will be constantly monitoring retention rates from 1st to 2nd fall and from 2nd to 3rd fall, to make sure that students are progressing through the degree (we set minimum retention rate at 85% for 1st to 2nd fall and 80% for 2nd to 3rd fall—we hope to do significantly better).

D. Implementation Plan

The SA/VS B.S. degree in digital media and designed will be aligned with and meet the expectations of the College of Fine Arts' strategic plan for 2015-2021.

E. Reporting and Benchmarking

We hope to make such important data as retention and graduation rates for our degrees available on the School's website. We also will be featuring the successes of our graduates on our website and through social media. **F. Incentives**

The leadership of the College of Fine Arts and SA/VS are actively engaged in development. The goal is to achieve significant support for our programs through funding of scholarships, facilities, and faculty support.

G. Balancing Quality and Quantity

While we believe that the new B.S. degree in Digital Media and Design will be very popular with current and prospective students, we will not allow the program to grow beyond the ability of our current faculty and facilities to manage. If we cannot find additional recurring dollars to support expansion of the degree once we have reached capacity, we will begin to limit enrollment through higher admission requirements, etc. While it is our goal to let any prospective student major in the new degree, we will take a realistic approach to expansion and be careful not to outgrow our resources.

Full Proposal - Quality: Program Quality and Student Success

1. List all student learning outcomes of the program.

The School of Art and Visual Studies is accredited by the National Association of Schools of Art and Design (NASAD). In proposing the B.S. degree in Digital Media and Design we are following the national standards set by NASAD:

1. Knowledge of the concepts related to the visual, spatial, sound, motion, interactive, and temporal elements/features of digital technology and principles for their use in the creation and application of digital media-based work.

2. Understanding of narrative and other information/language structures for organizing content in time-based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems.

3. Understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society.

4. Knowledge of the processes for the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.)

5. Ability to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically-mediated communication, objects, and environments.

6. Knowledge of history, theory, and criticism with respect to such areas as film, video, technology, and digital art and design.

7. Ability to work in teams and to organize collaborations among people from different disciplines.

8. Ability to use the above competencies in the creation and development of professional quality digital media productions.

2. Explain how the curriculum achieves the program-level student learning outcomes by describing the relationship between the overall curriculum or the major curricular components and the program objectives.

See attached curricular map (appendix #1) for the B.S. degree that indicates the correlation between the student learning outcomes and the courses in which these outcomes are addressed.

3. Highlight any distinctive qualities of this proposed program.

The DMD B.S. degree will bring U.K up to the degree offering standards available to most students enrolled in similar studio art programs in other Southern Regional Education Board (SREB) states. But its integrative approach to digital media most closely resembles only those degree programs offered by comparable flagship, research I universities, such as the University of Florida, the University of George, and the University of Texas. And even these institutions do not possess a degree program that weaves so closely together graphic design, video, web design, photography, 3-D fabrication and print media. And we took the unique step of shaping the degree as a bachelor of science degree, emphasizing not only the applied nature of the program but also the number of studios required by students, more than a B.A. in studio art and only slightly less than a B.F.A.

We currently have 13 faculty whose creative research occurs in and through digital-based platforms. Our faculty includes many artists with national and international reputations and exhibition records. We anticipate the School of Art and Visual Studies Building will further connect the pedagogical and research interests of the digital faculty, since for the first time in SA/VS' history they will be working and teaching in close proximity to each other. We expect our new studios to foster unprecedented levels of collaboration among faculty and between faculty and students.

We are always looking to collaborate with other programs. We see our majors pursuing extensive coursework at UK in the Writing, Rhetorical and Digital Media program (WRD) in the College of Arts and Sciences. There are also natural collaborative possibilities with the College of Communication and the College of Design. We are currently pursuing the possibility of offering a Ph.D. in 3-d virtual visualization in partnership with UK Healthcare's department of Thoracic and Cardiovascular Radiology. And as soon as the School of Art and Visual Studies Building opens in the summer 2015 we will be partnering with the College of Agriculture's Department of Biosystems and Ag Engineering's technical systems management (TSM) degree program. The current plan is to have students enrolled in the TSM program do their first required internship hours in SA/VS's Fabworks, the 3-d design studio, working with faculty and students by providing technical support. We hope to place SA/VS's DMD majors in some TSM courses and to have access to Ag Engineering's professional light manufacturing facilities.

As the DMD program matures we hope to add an integrated internship program, similar to Ag's TSM program to place currently enrolled students in jobs closely related to their degree interests. We hope to create an environment where students can make seamless transitions from school to the workforce.

The DMD degree will serve a student population seeking immediate job-related skills rather than training specific to careers as fine artists. (However we expect many graduates to go on to graduate programs in fine arts with a digital basis.) We currently have about a 200-major capacity above those majors we already serve. Our capacity is directly related to the number of instructional staff available. Future investments to enlarge the program would have to be a College of Fine Arts and UK decision. In the absence of faculty growth we would cap enrollments at 200 students. Initially, the degree would be open to any student regardless of background who wishes to pursue a career in digital media and design.

We are confident that there is more than sufficient demand for this degree. There is certainly nothing comparable to it at UK and we have a faculty size and expertise that is unrivaled in the Commonwealth.

4. Will this program replace any existing program(s) or specializations within an existing program?

YES

Please specify.

The new B.S. degree is an extension, rather than a substitution for current curricula and practices in SA/VS. As such, the program will offer undergraduates a greater variety of degree options without requiring significant reshuffling of academic assignments or course offerings. The School will simply be able to give greater coherence to the courses useful to students seeking digital-based skills.

5. Include the projected faculty/student in major ratio.

At full capacity (approximately 200 majors) the faculty/student ratio would be 1/15.

6. Is there a specialized accrediting agency related to this program?

YES

Please identify the agency.

National Schools of Art and Design

Do you plan to seek accreditation?

Yes

Please explain your plans for accreditation.

Upon approval by the University Senate and Board of Trustees, we will submit the new degree for accreditation by the National Schools of Art and Design.

7. Attach SACS Faculty Roster Form.

See attachment (appendix #3).

8. A. Describe the library resources available to support this program. You may attach any documentation provided to SACS.

Library resources for the new degree are the same that supports our other degree programs in SA/VS. The Art collections in the Lucille Caudill Little Fine Arts Library comprise over 60,000 volumes of monographs. There are approximately 140 serials subscriptions and another eight subscriptions for online databases that specifically serve art studio and art history, such as *ArtStor*, *Art Index*, *Artbibliographies Modern* and *Bibliography of the History of Art*.

B. Describe the physical facilities and instructional equipment available to support this program. Physical facilities and instructional equipment must be adequate to support a high quality program. The proposal must address the availability of classroom, laboratory, and office space as well as any equipment needs.

SA/VS has moved into a new facility (Fall 2015). Whereas before the building opened SA/VS operated three computer labs in various locations on the UK campus, in the new building we have five such labs and will be developing a computer inventory to outfit a sixth (for which we already have space). In addition, we have a photography suite which includes the capacity to make large scale digital prints; we have a "FabLab", a three-dimensional fabrication studio with computer-based laser cutters, 3-d printers, C-and-C router, vacuum former, and various light machinery; and we have a print shop set up to design and fabricate digital prints. All digital faculty have appropriate office or studio space. Finally, we operate a media center where students can check out film and digital cameras, lighting equipment, drawing pads, and similar digital technology.

9. Clearly state the admission, and retention, and completion standards designed to encourage high quality.

As the state's flagship and land grant university we have an obligation, as far as possible, to admit any student who is academically qualified to attend U.K. into our major. Initially, we should be able to admit any student into the degree program who wishes to major in digital media and design. Once we reach near capacity, around 200 majors, we will have to begin restricting admissions through a combination of grade point average and portfolio review (we have not developed the precise metrics yet). We initially will be able to provide scholarships to students who maintain a 3.0 g.p.a. or better, but we expect with rising numbers of majors we will have to raise the g.p.a.s for scholarship support. We hope that by financially helping to support the better students in the program we will be acting to raise retention and completion rates in SA/VS overall.

10. Clearly state the degree completion requirements for the program.

The B.S. degree shares a number of basic requirements with the B.A. and B.F.A. in studio art. Among them, with some differences in emphasis are 19 hours of Foundations, including six guided electives in art history. There are 27 hours of required studio courses at the 300 level or above plus nine hours in what we call our "Career Pathway Core", which consists of a projects capstone course, a professional practices course which also serves as the degree's graduation communication and composition requirement, mandated by the UK Faculty Senate, and a credit bearing course for professional internships. Students also have at least six credit hours of guided electives in art history and visual culture at the 300-level and above.

Program	Total number of hours required for degree	Number of hours in degree program core	Number of hours in guided electives	Number of hours in free electives
B.S. Digital Media and Design	121	49	30	18

12. Describe how the proposed program will articulate with related programs in the state. It should describe the extent to which student transfer has been explored and coordinated with other institutions. Attach all draft articulation agreements related to this proposed program.

Currently, there are no exact equivalents to the B.S. degree in digital media and design in the Commonwealth. However, in Kentucky, Murray State offers a full range of graphic design courses as an area of concentration within their studio program, but no separate degree. NKU offers a Visual Communication Design degree, which formerly was a graphic design degree. EKU offers a BFA in Graphic Design. WKU offers a graphic design track within their BA and BFA degrees. Finally the University of Louisville has a BFA in Communication and Design. Our degree is more expansive than any of these in that it includes digital fabrication, video, animation, sound, and photography within the major. Nonetheless any student who begins a degree in studio at any community college or four-year institution should be able to transfer into the U.K. SA/VS B.S. degree program with only a minimum of extra coursework at the studio foundation level. Thus no degree agreements have been deemed necessary.

13. List courses under the appropriate curricular headings.

See attached (appendix 4).

14. Will this program utilize alternative learning formats (e.g. distance learning, technology-enhanced instruction, evening/weekend classes, accelerated courses)?

YES

- YES Distance learning
- NO Courses that combine various modes of interaction, such as face-to-face, videoconferencing, audioconferencing, mail, telephone, fax, e-mail, interactive television, or World Wide Web
- NO Technology-enhanced instruction

- NO Evening/weekend/early morning classes
- NO Accelerated courses
- NO Instruction at nontraditional locations, such as employer worksite
- NO Courses with multiple entry, exit, and reentry points
- NO Courses with "rolling" entrance and completion times, based on self-pacing
- NO Modularized courses

Please describe planned alternative methods of program delivery involving greater use of technology, distance education, and/or accelerated degree designs, to increase efficiency, better address student educational and workforce needs, and maximize student success, for both traditional and non-traditional students.

Less than 5% of the B.S. degree program will initially be offered via distance learning. We offer only one course, A-S 280 Introduction to Photographic Literacy, that is fully online, and several other courses, A-S 200, Introduction to Digital Art, Space and Time, and A-S 340, Graphic Design, which have been designed to be delivered wholly online, but which have not yet been taught in this format. We do offer courses that combine various modes of interaction, such as face-to-face, videoconferencing, audio-conferencing, mail, telephone, email, etc. By the nature of the material our courses are based on technology-enhanced instruction. The online delivery of lectures for A-S 200 and A-S 340 do allow students to pursue their coursework in the evenings and on weekends.

We would like to develop further the online presence of the degree, but we are constrained by limited resources in terms of technology support. This is something we expect to work on in the years ahead.

Full Proposal - Demand: Program Demand/Unnecessary Duplication

1. Student Demand:

a. Provide evidence of student demand at the regional, state and national levels.

We surveyed the 73 public colleges and universities that are accredited both by SACS and by our national accreditation body, NASAD. We determined that of these schools SA/VS has the 9th largest faculty on staff. 46 of the 73 studio art programs offer B.A. or B.F.A. degrees in some form of graphic design, visual communication and/or digital media, as well as fine arts degrees. However, only the largest schools, typically the respective states' land grant and research institutions, offer programs comparable to what SA/VS is proposing. The University of South Carolina offers a B.A. in Media Arts. Louisiana State University offers a BFA in Digital Art. The University of Texas at Austin offers a BFA in Design (inside the studio art program). The University of Texnessee at Chattanooga has a BFA in photography and media art. The University of Georgia has what it terms an "Art X" BFA, a digital-based intermedia degree. East Carolina University offers a BFA in Cinematic Arts and Media Production. Appalachian State has majors in Graphic Arts & Imaging and Technology and Commercial Photography. In Kentucky, Murray State offers a full range of graphic design courses as an area of concentration within their studio program, but no separate degree. NKU offers a Visual Communication Design degree, which formerly was a graphic design degrees. Finally the University of Louisville has a BFA in Communication and Design.

The sheer number of programs offering separate graphic design degrees is a clear reflection of student demand. In our experience prospective students and their parents typically ask first about the availability of graphic design courses and degree before inquiring about any other aspect of what SA/VS might offer students. SA/VS faculty have been strongly opposed to the idea of offering just another graphic design degree. There are enough of these already. They want to create a degree program that responds to the growing integration of computer-based design and the variety of lens-based media. Our degree will integrate photography (represented by five full-time faculty), digital media and graphic design (Five full-time faculty), Printmedia (one faculty), three-dimension digital fabrication (two faculty), and other faculty and disciplines with a strong interest in incorporating digital media into their studio practices.

We surveyed students currently enrolled in our digital-based courses (A-S 200, Introduction to Digital Art, Space and Time, A-S 280, Introduction to Photographic Literacy, A-S 300, Digital Photography, and A-S 340, Graphic Design to see what students were looking for that UK was currently not offering. 347 students responded, with 229 expressing interest in a major in digital media and design and 338 percent agreeing with the statement that the skills provided by digital-based courses are important to today's job market. Keep in mind that only 31 students who participated in the poll were majors or double majors in SA/VS, which is to say that 91% of the respondents were only enrolled in these courses to fulfill their UK Core Creativity requirement.

Student interest in such a degree at UK parallels enrollments at other colleges and universities that offer either a graphic design B.A. or B.F.A. or a digital arts degree. We contacted administrators of units across the Southern Athletic conference and they all report that the greater proportion of their majors are in these majors compared to those students enrolled in traditional fine arts degree programs. Colleges and universities who start up such programs routinely receive strong bursts in enrollment growth.

b. Identify the applicant pool and how they will be reached.

Currently, the University has nearly 113 students who have declared for the minor in Digital Media and Design and another 24 minoring in photography. It is expected that a large majority of these students will declare a Digital Media and Design major once they are able to do so. Extensive outreach will be employed to inform other students of the Digital Media and Design major using mailings, social media, and our extensive network of high school art teachers throughout the state.

We also intend to use the usual public relations media, such as UKNow and the University faculty, staff, and student listserv to inform advisors and students of the availability of the new degree. We also intend to target the art faculty at the state's community colleges to alert them of the possibility for transfer into the new degree program (currently almost 50% of the majors in the School of Art and Visual Studies are transfer students).

c. Describe the student recruitment and selection process.

The Digital Media and Design major will be advertised to students via University media and a University website that is linked to the School of Art and Visual Studies website. We will be sending out posters to Kentucky high school art faculty and to art faculty in the Commonwealth. We will also announce the new degree to the studio art program faculty in the state's colleges and universities.

Initially, all students academically eligible to be at the University of Kentucky will be eligible to major in Digital Media and Design. Students however must complete the Digital Foundations coursework before enrolling in advanced coursework in the major. To declare the major, students will go to the Undergraduate Studies offices to obtain the appropriate paperwork and turn this paperwork into the College of Fine Arts office. Students will then be considered declared and will be assigned an advisor in the program.

d. Identify the primary feeders for the program.

The Digital Media and Design major will attract students interested in pursuing careers in creative arts related fields. This degree will enhance Kentucky's workforce by producing creative, articulate, and collaboration-minded individuals with multiple competencies in digital-based visual design and communication fields that are in high demand in business and industry. As an applied arts degree, we expect to attract students with a fine arts background, either in high school or at the college level. The degree would offer a visual arts alternative to students who might otherwise seek degrees in the Colleges of Communication, Arts and Sciences, Design, and even some students who might otherwise major in the College of Engineering. However, our intention is not to draw students away from existing majors but rather to provide a practical alternative for students who want an art degree but who are concerned that the degree would lead to non-fine arts post-graduation employment opportunities. We believe that the primary feeders for this new degree will be the state's high schools and community colleges.

e. Provide any evidence of a projected net increase in total student enrollments to the campus as a result of the proposed program.

SA/VS is the beneficiary of a brand new \$22 million dollar facility that ranks among the best facilities of its kind in the United States. We possess an overall faculty that in size ranks among the top ten art schools in the Southeastern U.S. Whereas in our former facility we were a recruiting embarrassment to the University, we are now, or should be, a recruiting highlight for UK. With six digital media labs, a Fablab, a full service print media shop, a complete analogue/digital photography suite including a lighting studio, our students will be able to undertake state-of-the-art creative research in multiple areas and in two and three dimensions. Considering that our minor in digital media and design has only been active since Fall 2014, the 113 minors we already have is a clear indicator of the pent-up student demand for what the new degree will have to offer. It is hard to imagine how the new degree would not contribute to increasing the total student enrollment at U.K.

c.Project estimated student demand for the first five years of the program.

Academic Year	Degrees Conferred	Majors (Headcount) - Fall Semester
2016-2017	0	5
2017-2018	0	60
2018-2019	10	80
2019-2020	30	140
2020-2021	50	200

2. Employer Demand:

a. Describe the types of jobs available for graduates, average wages for these jobs, and the number of anticipated openings for each type of jobs at the regional, state, and national levels.

Graduates of the proposed B.S. degree in Digital Media and Design will be gualified for multiple related fields, as art directors, graphic designers, multimedia artists and animators, web developers, photographers, film and video editors, and commercial and industrial designers. Beginning with art directors, the U.S. Department of Labor, using 2012 statistics, cited 74,800 jobs nationally with a median salary of \$80,080, and with an expected growth of 3%. In Kentucky the forecast is for a 10% growth in this area by 2022. Qualifications for art directors include training as graphic designers, illustrators, copy editors, and photographers (all of which will be addressed in the new degree). In the field of graphic design nationally in 2012 there were 259,500 jobs with a median salary of \$44,150. The U.S. government projects a 7% growth in the field, but in Kentucky, a 14% growth has been projected. There were 68,000 jobs for multimedia artists and animators in 2012 with a median salary of \$61,370. The Department of Labor expects a 6% growth in this field; in Kentucky a 13% growth has been projected. The Department of Labor expects a 20% growth in demand for web developers. In 2012 there were 141,400 jobs nationally with a median salary of \$62,500. For students seeking jobs as photographers there were 136,300 jobs nationally in 2012 with a median salary of \$28,490, and with an expected growth rate of 4%. A 11% growth in positions for film and video editors has been projected and a 16% growth in jobs for commercial and industrial designers by 2022. Some of our graduates will even acquire the skills necessary to be software developers, a booming business in which there were 1,018,000 jobs nationally in 2012 with a median salary of \$93,350. Both in Kentucky and nationally a growth of about 21% is expected in this field.

In short, all these fields can expect at least moderate growth in available positions. Most job fields offer better than the state average in median salaries. These fields are vital components of the commercial sector of the state's economy. They serve for example Office and Administrative Support Occupations, where an expected 16,000 new jobs will develop by 2022. As the commercial sector grows the demand for graduates with our training will only increase.

3. Academic Disciplinary Needs:

Recent studies by cultural economists such as John Howkins, Douglas DeNatale, Gregory Wassall, Richard Fields and many others have not the importance of creativity in contemporary economies. While there are innumerable graphic design degree programs around the country, there is a shortage of programs that are tailored to the creative professionals who give the designers their charge. Similarly, increasingly design demands cross traditional disciplinary boundaries, and includes everything from expertise in programming, web design, layout, photography and so on. The new generation of designers needs to be versed in all aspects of visual production because increasingly they are called upon to work in all digital media. The new B.S. degree services precisely this need for both creative and diversely equipped employees.

a. If the proposed program is an advanced practice doctorate, explain the new practice or licensure requirements in the profession and/or requirements by specialized accrediting agencies that necessitate a new doctoral program.

This digital media and design major is currently proposed only as an undergraduate degree.

4. Similar programs:

a.Are there similar programs in other Southern Regional Education Board (SREB) states and in the nation? YES

Please identify similar programs in other SREB states and in the nation.

Several state flagship universities in SREB states offer programs resembling the U.K. degree. The University of Florida offers a B.F.A. degree in Art with an emphasis in what they term the Art + Technology program, which consists of such things as "digital imaging, computer programming, web design, digital video, animation, interactivity, gaming, installation, simulation, information visualization and special topics in emerging technologies and art forms." The University of Texas offers a B.F.A. degree in design, which includes "graphic design, product/industrial design, film/animation, and architecture, creating hybrid environments and artifacts." The University of Georgia has a program they call Art X, consisting "of time-based forms, digital video, computer and web-based art, digital photography, robotics, sound, performance, durational installation and computer-operated fabrication."

b. Our records indicate the following similar programs exist at public institutions in Kentucky.

---- No Programs Exist----

Full Proposal - Cost: Cost and Funding of the Proposed Program

1. Will this program require additional resources?

NO

Please provide a brief summary of additional resources that will be needed to implement this program over the next five years.

2. Will this program impact existing programs and/or organizational units within your institution?

NO

Please describe the impact.

3. Provide adequate documentation to demonstrate sufficient return on investment to the state to offset new costs and justify approval for the proposed program.

Since there are no new costs, the state gets the advantage of a job-creating degree without any investment. Should the program be as successful as we hope we would ask, but not expect, at least one new faculty line.

A. Funding Sources, by year of program	1st year	2nd year	3rd year	4th year	5th year	
	\$1,649,595	\$1,632,539	\$1,926,492	\$2,134,596	\$2,228,540

Full-Proposal - Assess: Program Review and Assessment

1. For each assessment method, please provide direct indicators of achievement of program-level student learning outcomes and frequency of data collection:

a. Which components will be evaluated?

Student contributions to the Foundation Exhibition will be assessed in the freshman year; A-S 200 Introduction to Digital Art, Space and Time will be assessed, usually in a student's sophomore year; A-S 547 Digital Media Capstone course offers a third assessment point, which would normally be taken in the student's senior year. We will carry out a different assessment plan for the university-mandated GCCR course (A-S 301—we are going to submit a minor course change to renumber ART 301 to A-S 301 this academic year).

b. When will the components be evaluated?

All assessment materials will be evaluated at the end of the spring semester annually.

c. When will the data be collected?

The Foundation exhibition is held annually near the end of the spring semester; A-S 200 will be assessed in the fall semester annually; the Digital Media Capstone course will be assessed each spring.

d. How will the data be collected?

An independent juror assesses the work exhibited in the Foundations exhibition according to a scorecard developed by the Foundations advisory committee; the Digital Media and Design assessment committee will review a 10% sample of online student portfolios as submitted to A-S 200 Digital Art, Space and Time; the Digital Media and Design assessment committee will evaluated student portfolios for their application of applied digital design concepts, related to the visual, spatial, sound, motion, interactive, and temporarl elements/features of digital technology and principles using a scorecard developed by the committee.

e. What will be the benchmarks and/or targets to be achieved?

We have targeted a mean rubric score of 2 or greater on a scorecard of four points for each SLO (1 least mastery; 2 below average, 3 competent; and 4 exemplary).

f. What individuals or groups will be responsible for data collection?

For the Foundations exhibition we use an independent juror; the Digital Media and Design assessment committee, composed to faculty within the major are charged for gathering and evaluating the data.

g. How will the data and findings be shared with faculty?

The faculty of record will receive a summary document detailing the specific, mean numerical outcomes (based on our rubric for assessments of each SLO) for each assessment per year. This will be an electronic communication. If areas of concern are noted (for example, if mean numerical assessments are lower than "2" on the "0-4" assessment scale of the rubric), a meeting of all relevant faculty of record will be convened and a plan of remediation will be designed and subsequently implemented.

h. How will the data be used for making programmatic improvements?

If targets described above are not achieved (e.g. a mean evaluation score of higher than 2 is not realized on any given assessment measure), the Foundation Director and the Digital Media and Design assessment committee will initiate a review of the relevant SLO(s) and the courses in which that SLO(s) is assessed to identify areas of strength and potential weakness. If clear corrective measures or revisions are not readily identified, the relevant assessment officers will convene a meeting of the faculty of record to initiate a collaborative discussion with regard to designing a remediation plan.

2. What are the measures of teaching effectiveness?

All faculty of record will be evaluated using University Teacher Course Evaluations (TCEs) completed by their student each term. All TCEs are public record and accessed via the University website. The Director biennially reviews tenured faculty and annually reviews lecturers and un-tenured faculty for their teaching effectiveness.

3. What efforts to improve teaching effectiveness will be pursued based on these measures?

Areas of concern will be summarized and communicated to the individual faculty of record as part of their regular evaluation. If deemed necessary the director of the School of Art and Visual Studies will request a plan of remediation from the respective faculty members. Additional options aimed at improving teaching, if needed, include supporting faculty development through College and University programs, as well as participation in relevant pedagogical conferences and symposia.

4. What are the plans to evaluate students' post-graduate success?

The Director will obtain data from the Alumni Survey annually and will additionally create a separate and brief web-based survey of educational and career outcomes to be communicated to current students and alumni in electronic format.

ATTACHMENT #3

(A) BS Degree in Digital Media and Design School of Art and Visual Studies, CFA, UK

(B) Plan for Assessment of BS in Digital Media and Design Student Learning Outcomes Doreen Maloney, Assessment Coordinator

for the academic year 2016-2017

(C) MISSION STATEMENT

The Digital Media and Design (DMD) bachelor of science degree in the School of Art and Visual Studies educates its students in studio-based digital media practices at the pre-professional level. This degree is available to students who plan to undertake careers that require creative use of digital imagery with artistic and/or commercial applications, involving digital design and illustration, photography, video, sound and digital-based fabrication.

(D) STUDENT LEARNING OUTCOMES for the PROGRAM

The assessment the student learning outcomes will be grouped into two, four-year cycles. The SLO numbered 1-4 will be assessed during the first four years of the degree program. The SLOs numbered 5-8 will be assessed during the second four years of the degree program.

1. Knowledge of basic and advanced concepts related to the visual, spatial, sound, motion, interactive, and temporal elements/features of digital technology and principles for their use in the creation and application of digital media-based work.

2. Understanding of narrative and other information/language structures for organizing content in time-based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems.

3. Understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society.

4. Knowledge of the processes for the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.)

5. Ability to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically-mediated communication, objects, and environments.

6. Knowledge of history, theory, and criticism with respect to such areas as film, video, technology, and digital art and design.

7. Ability to work in teams and to organize collaborations among people from different disciplines.

8. Ability to use the above competencies in the creation and development of professional quality digital media productions.

(E) ASSESSMENT METHODS

1. Knowledge of basic and advanced concepts related to the visual, spatial, sound, motion, interactive, and temporal elements/features of digital technology and principles for their use in the creation and application of digital media-based work.

Method 1A. The juror of the Foundation Exhibition will assess the work as shown. Work will be evaluated for applied digital design concepts, using a scorecard developed by the Foundations Advisory Committee. (The juror will fill out two assessment forms, one for the B.A. and B.F.A. degrees and one for the DMD program.)

Timeline 1A: The Foundation Exhibition occurs each spring semester and all students in the Foundations Program are required to participate.

Method 1B. The Digital Media and Design Assessment Committee will review a 10% sample of the work as proposed and created in A-S 547 Digital Media Capstone Class. Work will be evaluated for applied digital design concepts, related to the visual, spatial, sound, motion, interactive, and temporal elements/ features of digital technology and principles using a scorecard developed by the the Digital Media Projects Capstone Committee.

Timeline 1B. The Digital Media Projects Capstone class occurs each spring semester and all students graduating in the degree program must participate.

Method 1C. The Digital Media and Design Assessment Committee will review a 10% sample of online student portfolios as submitted for A-S 200 Digital Art Space and Time.

Timeline 1C: The Digital Media and Design Assessment Committee will review these portfolios in the fall semester.

2. Understanding of narrative and other information/language structures for organizing content in time-based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems.

Method 2A. The Digital Media and Design Assessment Committee will review a 10% sample of the work as proposed and created in A-S 547 Digital Media Capstone Class. Work will be evaluated for applied understanding of narrative and other information/language structures for organizing content in time-based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems using a scorecard developed by the the Digital Media Projects Capstone Committee.

Timeline 2A: The Digital Media Projects Capstone class occurs each spring semester and all students graduating in the degree program must participate.

Method 2B. The Digital Media and Design Assessment Committee will review a 10% sample of online student portfolios as submitted for A-S 346 Video Art and A-S 347 Multimedia Art.

Timeline 2B: The Digital Media and Design Assessment Committee will review these portfolios in the spring semester.

3. Understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society.

Method 3A. The Digital Media and Design Assessment Committee will review a 10% sample of the work as proposed and created in A-S 547 Digital Media Capstone Class. Work will be evaluated for applied understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society using a scorecard developed by the the Digital Media Projects Capstone Committee.

Timeline 3A: The Digital Media Projects Capstone class occurs each spring semester and all students graduating in the degree program must participate.

Method 3B. The Digital Media and Design Assessment Committee will review a 10% sample of online student portfolios as submitted for A-S 285 Lens Arts.

Timeline 3B: The Digital Media and Design Assessment Committee will review these portfolios in the fall semester.

Method 3C. The Digital Media and Design Assessment Committee will review a 10% sample of online student portfolios as submitted for A-S 546 Digital Fabrication.

Timeline 3C: The Digital Media and Design Assessment Committee will review these portfolios in the spring semester.

4. Knowledge of the processes for the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.)

Method 4A. The Digital Media and Design Assessment Committee will review a 10% sample of the work as proposed and created in A-S 547 Digital Media Capstone Class. Work will be evaluated for applied understanding or the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.) using a scorecard developed by the the Digital Media Projects Capstone Committee.

Timeline 4A: The Digital Media Projects Capstone class occurs each spring semester and all students graduating in the degree program must participate.

Method 4B. The Digital Media and Design Assessment Committee will review a 10% sample of online student portfolios as submitted for A-S 340 Graphic Design.

Timeline 4B: The Digital Media and Design Assessment Committee will review these portfolios in the fall semester.

Method 4C. The Digital Media and Design Assessment Committee will review a 10% sample of online student portfolios as submitted for A-S 346 Video Art and A-S 347 Multimedia Art.

Timeline 4C: The Digital Media and Design Assessment Committee will review these portfolios in the spring semester.

(F) USING RESULTS TO IMPROVE THE PROGRAM

Results of assessments of these four learning outcomes will be presented by the BS in Digital Media and Design Assessment Committee to the Director and School of Art and Visual Studies. These results may also be presented to the Dean of the College of Fine Arts and the Provost, along with any actions needed to improve the curriculum and increase students' achievement of the expected learning outcomes.

UK School of Art & Visual Studies

ATTACHMENT #4

Faculty Meeting Minutes: February 6, 2015

Present: Ruth Adams, Jane Andrus, Garry Bibbs, Anna Brzyski, Alice Christ, Jeremy Colbert, Rob Dickes, Beth Ettensohn, Matt Gilley, Rae Goodwin, Garrett Hansen, Marty Henton, Stuart Horodner, Robert Jensen, Hui Chi Lee, Doreen Maloney, Andrew Maske, Jonathan McFadden, Matt Page, Allan Richards, Arturo Alonzo Sandoval, Jessica Santone, Bobby Scroggins, Bob Shay, Brandon Smith, Rob Southard, Hunter Stamps, Lynn Sweet, George Szekely, Sarah Wylie Van Meter, Monica Visonà, Paolo Visonà, James Wade, Kate Wheeler, Nicole White, David Wischer

The meeting was called to order at 2:00 pm. The minutes from January 2015 were approved with one abstention (Monica Visonà moved, Rob Dickes seconded).

Director's Announcements:

New Business:

Doreen Maloney reported that the proposed Bachelor of Science in Digital Media & Design was unanimously approved by the Art Studio faculty and now needs the approval of the full faculty. She explained the proposed degree requirements and Bulletin entry. Discussion and questions followed.

The vote was called to approve the B.S. in Digital Media & Design with minor changes. Garrett Hansen moved, Arturo seconded, and the motion passed with one abstention.

The degree still has to be approved by the Council on Post-Secondary Education, which is a long process. The degree will most likely be implemented in Fall 2016 if it is approved.

Rae Goodwin reported on the B.A./B.F.A. Committee's progress. The following changes are proposed:

- 1. Removal of the restrictions on using art courses in the CORE (aka "double-dipping")
- 2. Addition of a 500-level studio course
- 3. ART 191, A-S 201 dropped from curriculum
- 4. Addition of ART 301
- 5. Removed required minor
- 6. Increase number of elective hours
- 7. Change the title of A-S 200 back to "Digital Art, Space, & Time"
- 8. Provide more Studio Core options
- 9. Reword the Bulletin language

Hunter Stamps reported that the B.F.A. is proposing similar changes, plus adding 6 credits of 500-level studio courses.

The vote was called to approve these changes to the B.A. and B.F.A. in Studio Art. Arturo moved, Rob Dickes seconded, and the motion passed unanimously.

Other reports:

Faculty Performance Evaluations are in your mailboxes. Please sign them and return them to Jane Andrus as soon as possible. Discussion followed on the Teacher Course Evaluation process and the new Explorance System.

Midterm grading is coming up March 2-13. All undergraduates are required to have midterm grades assigned. Faculty should go ahead and give midterms to graduate students too.

Stuart announced that School of Art faculty are treated like Art Museum Members. They can participate in preview exhibitions and meet artists just as regular Members can.

The next faculty meeting is Friday, March 6.

The meeting was adjourned at 3:16 pm.

From: "Clymer, Jeffory A" <jeff.clymer@uky.edu> Subject: Re: approval needed for directed electives in English Date: April 8, 2016 at 1:59:26 PM EDT To: "Jensen, Robert" <Robert.Jensen@uky.edu>

Dear Rob,

The English Department welcomes your students into all ENG courses, and especially film courses, as part of their directed electives in your bachelor of science in digital media and design.

Thanks for asking! Best,

Jeff

Jeffory A. Clymer Professor and Chairperson Department of English University of Kentucky 859.257.2901 <u>http://english.as.uky.edu/users/jaclym3</u> http://english.as.uky.edu/

To: "Clymer, Jeffory A" <<u>jeff.clymer@uky.edu</u>>
Subject: approval needed for directed electives in English

Hi Jeff,

The School of Art and Visual Studies has put a new degree, a bachelor of science in digital media and design, before the University Senate. It was recommended that because we indicated that students should have directed electives, but not necessarily a minor, in a particular discipline and because we suggested that English, and in particular, film courses taught within the English department, would be an excellent choice for such directed electives, we should seek agreement from the affected department. If there is space in your classes I cannot imagine why you would not want students from our program to enroll in them, yet I have been asked for written confirmation of your approval. If it is not too much trouble would you please be so kind as to write a line or two in an email agreeing to allow our students to take as guided electives English courses, and especially film courses.

Sorry to have to bother you with this. Best, Rob

Robert Jensen Director School of Art and Visual Studies 236 Bolivar Street University of Kentucky Lexington, KY 40506 859-257-2336

ATTACHMENT #6

From: Jeff Rice <j.rice@uky.edu> Subject: Re: another request regarding our B.S. degree Date: April 8, 2016 at 4:10:25 PM EDT To: "Jensen, Robert" <Robert.Jensen@uky.edu>

WRD completely approves allowing students in Art and Visual Studies to take guided elective WRD courses. In fact, we encourage it and support it.

best,

Jeff

On 4/8/16 12:14 PM, Jensen, Robert wrote:

Jeff,

You know what kinds of hoops the University curriculum and Senate committees make us jump through. It was recommended to me yesterday that because we indicated that students should have directed electives, but not necessarily a minor, in a particular discipline and because we suggested that WRD courses, and in particular, your documentary courses, would be an excellent choice for such directed electives, we should seek agreement from the affected department. If there is space in your classes I cannot imagine why you would not want students from our program to enroll in them, yet I have been asked for written confirmation of your approval. If it is not too much trouble would you please be so kind as to write a line or two in an email agreeing to allow our students to take as guided electives WRD courses. Sorry to have to bother you with this again. Rob

ATTACHMENT # 7

Communications with SAPC regarding the BS, Digital Media and Design Proposal

1. The memorandum dated 3/31/16 explains that a minor course change has been submitted for A-S 547 to change (among other things) its repeatability. Changing repeatability is a major change and must be approved by both the UC and GC. Given that this course has not been to either council, it is unlikely that the course will be approved prior to semester's end. *Because A-S 547 is a core requirement, the program should not be reviewed by Senate or the Board until the revised A-S 547 is approved by at least one council.* **A-S 547 has passed through UC committee and set for UC vote on Tuesday 12**

2. Question 2I notes that this degree program appears similar to the existing program in Media Arts and Studies (<u>http://ci.uky.edu/jat/major-media-arts-and-studies</u>). It may be difficult for students to understand the difference between the proposed BS in Digital Media and Design and the existing program in Media Arts and Studies. It would be helpful to have a letter of support from Media Arts and Studies that demonstrates how students will be able to differentiate between the two programs. *Addressed in attached document*

3. Question 2j states that assessment will be conducted by a faculty digital media and design assessment committee. It is not clear if the faculty of record are involved in this assessment committee. **Yes, the faculty of record is involved as stated:** *"student success will be monitored by a faculty digital media and design assessment committee, consisting of the faculty of record in the School of Art and Visual Studies"*

4. In Question 7h, about 10 courses are identified as pre-major/prof, but none of the courses are identified as core. Question 7j has narrative about core courses, but the core courses need to be identified in 7h.

7j explains the 121 hour degree requirements. Pre Major hours (19), Major core hours (9), Guided electives (33), Free Electives (60) See attached check sheet

5. Question 7j includes A-S 585, which is a new course – this is at the Undergraduate Council and will also require GC approval. *Because A-S 585 is a core requirement, the program should not be reviewed by Senate or the Board until the new A-S 585 is approved by at least one council. A-S 547 has passed through UC committee and set for UC vote on Tuesday 12*

6. Question 7m refers to ENG 387 as a guided elective, but ENG 387 is not an existing course. There is a course ENG 384 ("Literature and Film"), so perhaps the form has a typo and the course intended to be listed is ENG 384.

The degree requirements have been corrected ; ENG courses are no longer required for the degree.

7. Question 4c states that no courses from other units will be included, but question 7m (guided electives) includes courses from English and from Writing, Rhetoric, and Digital Media. Question 7l mentions Business and Economics courses, too. Letters of support will need to be submitted showing that faculty in outside units approve the use of their courses. *The degree requirements have been*

corrected; have letters of support for ENG, and WRD, and reference to Business and Economic courses have been removed; they are no longer required for the degree; therefore letters of support are not necessary.

8. The Signature Routing Log is blank, so it is difficult to know who has reviewed and approved this proposal. *Signature log has been addressed—see "Approvals/Reviews" p. 16.*

9. I do not know if this is relevant to the SAPC's deliberations, but the CPE paperwork at the end of the proposal indicates that UK's Board of Trustees approved this proposal a year ago (June 2015), which is incorrect. (Proposals are not sent to the Board until the Senate has approved them.) *Not an issue, per the Office of Planning and Institutional Effectiveness*.

Subject: Fwd: additional materials for the B.S. in Digital Media and Design

Dear Committee Members,

The following questions were satisfactory updated by Robert Jensen, Director of the School of Art and Visual Studies.

Via Margaret:

I recommend the following changes:

- 2a & 2d Please beef up your description and rationale for the program. Right now it reads very similar to the MAS degree (<u>https://ci.uky.edu/jat/media-arts-and-studies-program</u>). I realize the CIP codes are similar, but anything you can do to differentiate your program from an already existing one will help to solidify your case for the new program.

- The email you provide from Thomas Lindlof from CCI suffices for the letter differentiating your programs. Could you clarify who Thomas is please so I can make sure and use his title when I speak to the letter stating they do not see overlap between the two programs?

- This proposal is missing department minutes where this program was approved and the college committee, and college meeting minutes where this program was approved. A letter stating the date of the meeting and the outcome of the vote from the appropriate leadership will suffice (e.g., department chair, committee chair, and dean). Via Sheila:

1. The memorandum dated 3/31/16 explains that a minor course change has been submitted for A-S 547 to change (among other things) its repeatability. Changing repeatability is a major change and must be approved by both the UC and GC. Given that this course has not been to either council, it is unlikely that the course will be approved prior to semester's end. *Because A-S 547 is a core requirement, the program should not be reviewed by Senate or the Board until the revised A-S 547 is approved by at least one council.* **A-S 547 has passed through UC committee and set for UC vote on Tuesday 12**

Sheila,

Attached are some additional documents that help clarify and/or answer all the queries I was sent last week regarding the new bachelor of science degree in digital media and design. In addition to my addendum to the original March 31 letter of introduction I am included another edited version of the B.S. program proposal form that addresses all the minor queries as well as two emails from WRD and English supporting DMD students' enrollment in their respective courses. The two most disruptive issues, the course description revision for A-S 547 and the approval by the Undergraduate Council of A-S 585, have both been successfully addressed. We have re-written the course description but have made no change to the contact hours, so that the change should go through as a minor course change (it has been approved at the School and the College level already). The issue regarding graduate assignments for A-S 585 has been resolved and the course has been voted out of the Undergraduate Council. I have contacted the Graduate Council about expediting the approval of the graduate version of the course, so even though it is not required, this too should be done before the end of the month. Also attached are the minutes from the SA/VS faculty meeting at which the new proposal was approved by the faculty and the minutes of the College of Fine Arts when they approved the new degree proposal. I hope these documents satisfactorily address all the outstanding issues with our proposal. We are tremendously excited to get this degree up and running in the fall. All the best. Rob

BS Degree in Digital Media and Design School of Art and Visual Studies, CFA, UK

Curricular Map of BS in Digital Media and Design Student Learning Outcomes

MISSION STATEMENT

The Digital Media and Design (DMD) bachelor of science degree in the School of Art and Visual Studies educates its students in studio-based digital media practices at the pre-professional level. This degree is available to students who plan to undertake careers that require creative use of digital imagery with artistic and/or commercial applications, involving digital design and illustration, photography, video, sound and digital-based fabrication.

STUDENT LEARNING OUTCOMES for the PROGRAM

The eight student learning objectives adopted for this program are stipulated below. Following this list is a list of all degree courses offered at the present time to fullfil this degree.

In the table below, the numbers following each course title correspond to the NASAD learning objectives met by that course.

1. Knowledge of basic and advanced concepts related to the visual, spatial, sound, motion, interactive, and temporal elements/features of digital technology and principles for their use in the creation and application of digital media-based work.

2. Understanding of narrative and other information/language structures for organizing content in time-based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems.

3. Understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society.

4. Knowledge of the processes for the development and coordination of digital-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas.)

5. Ability to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically-mediated communication, objects, and environments.

6. Knowledge of history, theory, and criticism with respect to such areas as film, video, technology, and digital art and design.

7. Ability to work in teams and to organize collaborations among people from different disciplines.

8. Ability to use the above competencies in the creation and development of professional quality digital media productions.

Digital Media and Design Courses	Learning Objective Met
A-S 101 Creative Practices in Art Studio (taken first semester)	1, 2 ,5
A-S 001 Foundation Exhibition	1,4,5,7
A-S 102 Two-Dimensional Surface	5
A-S 130 Drawing	5
A-S 200 Introduction to Digital Art, Space and Time	1,2,3,4,5,6
A-S 285 Lens Arts	1,2,3,4,5,6
A-S 305 Studio Lighting	1,2,3,4,5,6,7,8
ART 301 GCCR	5,6,7,8
A-S 340 Introduction to Graphic Design, Meaning and Image	1,2,3,4,5,6
A-S 341 Graphic Design: Layout	1,2,3,4,5,6
A-S 345 Introduction to Web Design	1,2,3,4,5,6
A-S 346 Video Art	1,2,3,4,5,6
A-S 347 Multimedia: Topical (currently 2D Animation)	1,2,3,4,5,6
A-S 348 Circuits & Bits: Introduction to Hardware and Software Topics in Art	1,2,3,4,5,6,7
A-S 385 Digital Methods for Photography	1,2,3,4,5,6,
A-S 387 Topics in Photography	1,2,3,4,5,6,7,8
A-S 390 Digital Printmaking	1,2,3,4,5,6,7
A-S 480 Professional Practices in Photography	5,6,7,8
A-S 540 Graphic Design: Publication Design	1,2,3,4,5,6,7,8
A-S 541 Graphic Design: Advanced Design	1,2,3,4,5,6,7,8

A-S 546 Intermedia Studio	1,2,3,4,5,6,7,8
A-S 547 Digital Media and Design Projects	1,2,3,4,5,6,7,8
A-S 585 Industry Pathways and Practice	1,2,3,4,5,6,7,8
A-S 587 Advanced Topics in Photography	1,2,3,4,5,6,7,8
A-S 596 Workshop	1,2,3,4,5,6,7,8
A-S 687 Graduate Topics in Photography	1,2,3,4,5,6,7,8
A-S 777 Problems in Intermedia	1,2,3,4,5,6,7,8

Dear Rob,

Thank you for the opportunity to comment on the proposed B.S. degree program in Digital Media and Design (DMAD). As you know, we have discussed this proposal on several occasions, and the Media Arts and Studies (MAS) faculty have also weighed in with their views after becoming familiar with your faculty, the curriculum, and the proposed degree. I think I can speak for the MAS faculty when I say that we are satisfied that approval of the B.S. degree in DMAD will have mostly positive outcomes for both of our programs. To be sure, there are a few courses in your curriculum – especially in the areas of video, web, and multimedia design – that resemble courses already offered by MAS. However, I think we come at these areas of media design and production with rather different pedagogical objectives. In addition, the overall missions of our degree programs are different, with MAS more focused on preparing students for career paths in the media industries. This orientation includes not just content creation, but also media distribution, management, and analysis of the social and cultural influences of media. Thus I see our programs as complementary, rather than competitive, and I foresee many fruitful ways in which we might take advantage of this complementarity. For example, students can be encouraged to double-major in MAS and DMAD, and our faculties might explore joint ventures (projects, classes, etc.) that will benefit students from both programs. In summary, I see no real downsides for MAS if the B.S. degree program in DMAD is approved. In fact, if our very collegial relationship with DMAD continues, as I fully expect it will, there is reason to believe that it will be a win-win for both programs.

Best regards

Tom

Undergraduate Council March 30, 2016

This letter confirms that Writing, Rhetoric and Digital Studies supports and is aware of Art and Visual Studies' proposed B.S. degree in Digital Media and Design. We hope to collaborate with Art and Visual Studies on coursework as well as encourage students from both programs to minor in the other program.

Sincerely,

Jeff Rice Chair, Writing, Rhetoric and Digital Studies.
